

# Finding Out How Germany Works

#### By Marc Fisher Wash ington Post Service

BERLIN - By the time Barbette Selke mms 18 and begins work as a bakery salesclerk next year, she will know the nutritional values of 40 types of bread, how to wrap dozens of different rolls and cakes and what to recommend to customers seeking the perfect bread for toast.

She will have spent three years in training for a gnaranteed job, and while she may grouse a bit about her pay (\$514 a month) and the long training, she wouldn't have it any other way.

"I get to learn about all the products," she said, "and at the end, I know I'll have a job for the rest of my life if I want it."

As the U.S. presidential campaign focuses attention on a sagging job market and the lack of a national career training program, Germany's vocational training system has been held up as a model that forces the private sector to invest in young people while keeping youth unemployment low.

Germany's joint government-industry pro-gram, which trains 65 percent of the country's work force, is the modern version of the medieval guilds that passed on craft skills from one generation to the next. In 375 occupations in Germany today, ranging from baker to banker, from violin maker to laboratory assistant, the only way into a career is through a three-year formal training course mixing classroom and on-the-job training. Steady streams of U.S. basiness, labor and overnment officials have been traveling to

Germany to study what they see as a sure way to put young people in skilled, permanent

But although many U.S. labor experts are impressed with the German method, which requires businesses to pump 2 percent of their payroll into training, they warn that it would be difficult to adopt in the United States. The German idea of competing businesses joining hands to train workers — without any guar-antee that the workers they train will join their company - is not only anathema to the

U.S. ethic of competition, but may even violate antitrust laws.

"The relationship among business, government, education and labor is a partnership in Germany, while in the States it's adversarial, said Monika Aring, director of the nonprofit Institute for Education and Employment in Newton, Massachusetts.

In recent years, the German system appeared to be entering a long-term decline. Between 1984 and 1990, the oumber of West German youths seeking apprenticeship posi-tions dropped from 765,000 to 600,000, a trend that government officials attribute both to Germany's low birth rate and to rising interest in university education. But now the introduction of hundreds of thousands of East Germans into the system could reverse that slide.

What Germans call the "dual system" is, by American standards, a marvel of coopera-tion between the public and private sectors.

**On Central Committee,** Hard-Line Marxists and Liberals Are Purged

By Lena H. Sun

Washington Past Service BELJING — The Chinese Communist Party ended its congress on Sunday by embracing Deng Xiaoping's capitalist-style economic ini-tiatives and overhauling its policy-making Central Committee in a sweeping reshuffle, naming new nembers to nearly half the seats.

The party dropped many elderly veterans and, apparently in a compromise between hard-liners and moderates, purged orthodox Marx-ists as well as several leading hberals. Many of the new faces included younger technocrats and in a sign of the military's growing influence, several representatives from the country's regional military commands.

The changes came as the party closed its weeklong congress, held every five years. The party manimously endorsed a keynote report that takes Mr. Deng's visioo of a "socialist market economy" as the blueprint for the fu-3702

Although he was a specially invited delegate, the 88-year-old paramount leader did not make an appearance to take credit for the policies that the congress rubber-stamped.

Mr. Deng, who launched China's economic reforms in the late 1970s and has tried and failed twice to establish a succession, seems to have accomplished much of what he sought to achieve with this congress. The delegates abolished a powerful advisory commission headed by Chen Yan, a party elder and Mr. Deng's arch-rival. The congress also promoted many professionals to the Central Committee.

The real test of Mr. Deng's influence, however, will come Monday, when the oew Central Committee meets to elect the even more important Politburo and its all-powerful Standing Committee, the party's highest decision-mak-

ing body. Two hard-line members of the six-member Standing Committee are expected to step down, and three new members aligned with the modcrate camp are expected to be promoted, according to Chinese sources.

Among those who stepped down Sunday from the Central Committee were: President Yang Shangkun; Defense Minister Qin Jiwei; Wan Li, head of China's partiament, and two hard-line members of the Standing Committee of the party Politburo, Song Ping and Yao

All the individuals are expected to lose their Polithuro seats as well, and all except Mr. Song

International Herald Tribune FRANKFURT - German carmakers, practiced at justifying high price tags, are finding it more and more difficult to defend something they have always taken for grant-ed: their quality. To be sure, the label "Made in Germany"

generally still stands for quality workman-ship and dependability that will match competition anywhere. Most diplomats, taxi drivers and the Pope still favor Mercedes limousines, and many still robust Volks-wagen Beetles are older than their drivers. But the tank of goodwill is running low. Customer surveys in the United States and in. Germany increasingly confirm that German carmakers' competition, in addition to almost always having a price advantage, are also making vast improvements in the quality of their products, eroding a traditional and critical German competitive advantage. At

least in relative terms, the quality of German cars is slipping.

In a country where every fifth industrial job is directly or indirectly linked to motor vehicle production, the implications of the trend are being taken as seriously as the challenge of lean production.

"We were the best for decades, and now we're having to learn that others also know how to build cars and that they're getting better," said Albrocht Köster, the top executive for quality management at Mercedes-Benz and an industry spokesman on the sub-

# In Philippines' Thriving Ransom Industry, the Best Payers Are Chinese

By Philip Shenon New York Times Service

MANTLA --- When the children in some Chinese-Filipino families here head for school, they are handed cellular phones along with their lunch boxes and are reminded to call home every hour.

"My mom would have a heart attack if I didn't call," said one 10-year-old Manila boy, pulling a cellular phone from his pocket.

Other Chinese-Filipino children go nowhere without a chauffeured car and a brawny body-guard — a team of guards, if their parents have the money. Several Manila schools with ethnic Chinese students are guarded by armed patrols with shoot-to-kill orders.

It may be a sign of the economic desperation here that one of the big growth industries here is kidnapping. The targets are usually members of the small but comparatively affinent population of Chinese-Filipinos, who have a reputation for pay-ing lange transmission and its months who have a reputation for pay-ing lange transmission and its months who have a reputation for pay-ing lange transmission and its months who have a reputation for pay-ing lange transmission and its months who have a reputation for pay-ing lange transmission only to discover one of his biological pairs and the state of the state o

# In Bosnia Hospital, A Muslim Doctor's Horror and Tears

By John F. Burns New York Times Service

Page 2

SARAJEVO, Bosnia-Herzegovina - Outside the Kosevo hospital. a full moon was shining, shedding a cold, white light on the freshly buried war dead in the cemetery across the road. It was barely 7 P.M., and the moon and the lights at mursing stations were the only illumination in the crowded wards that house the most grievously wounded victims of the Sarajevo siege.

In a cubicle off a third-floor ward, a short walk from the center island where amputees' beds had been wheeled to put pillars between them and Serbian gun positions on the mountains, Dr. Mufid Lazovic sat with his head in his hands. In passionate, often overwrought bursts, he talked of his bitter expenences working as a surgeon on legions of wounded from the six months of siege. "What we have been through

here is a great horror, a horror beyond anything I could have imagined," he said, twisting his glasses in his hands, the moon lighting enough of his face to show the tears. "I have been a surgeon 16 years. I have seen many terrible things, but never anything like this. f have nightmares. I have seen such wounds that I wonder, if I survive this war, will I ever be psychologically normal again?"

Dr. Lazovic, 43, is a Muslim in a country where Muslims have been by far the most common victims of the war. They account for about 80 percent of the 200,000 people the government estimates have been ounded or killed.

For 24-hour shifts once every three days, Dr. Lazovic is chief of a medical team in a trauma clinic that struggles to save patients, 90 percent of them civilians, who have been torn apart by tank shells and mortars and sniper bullets. It is a battle against disabling odds.

For months, the Kosevo medical complex, a jumble of buildings on one of the most exposed hillsides in Sarajevo, has worked under artillery fire. Virtually every building has blast holes in its roof and walls, and dozens of its patients have come from shells exploding within the hospital grounds

The trauma clinic is the first stop for the most seriously wounded. Many are then transferred to specialized clinics on the Kosevo grounds. To stand at the emergency entrance is to watch a ghastly procession of bullet-riddled ambulances and, more often, battered private cars, racing up the hill and disgorging victims in bloodied blankets and sheets that serve as stretchers when shells strike in playgrounds and parking lots and city streets.

Inside, relatives press forward in an atmosphere of bedlam. Above

many patients have died. But the scrawled ledger at the entrance to the emergency department is filled with a repeated entry in Latin, Mortis ante portas, meaning dead on arrival.

Another unanswered question is how many might have been saved if . the clinic had been able to work in something like normal conditions. It was handicapped from the outset of the siege by the departure of doctors, nurses and other staff. members who were Serbs and who chose not to remain in a city being devastated by Serbian forces.

But a deficiency of medical staff is a less acute problem, for now, than other shortages. Request lists forwarded by the Bosnian government's medical crisis committee to the United Nations headquarters, which is responsible for convoys of relief supplies, have run to several typewritten sheets. Requests include antibiotics, painkillers, bot-

tled oxygen, blood plasma, surgical instruments, syringes, bandages, gauze, rubber gloves, doctors' and nurses' smocks, bed sheets and a score of other items.

UN supply efforts, interrupted by the fighting, have come nowhere close to meeting the needs. Yet the material shortages are mild in their effects compared with what the Serbian leaders have accomplished by cutting off the city's electricity and water.

For months, the clinic has relied mainly on its diesel-powered gener-

ator. On Wednesday afternoon, as dusk settled over the mountains ringing the city, Dr. Lazovic was racing up a flight of stairs to the clinic's intensive care unit, to check on a recent amputee with gangrenous infections, when he was inter-cepted by Nedim Masic, 26, au electrical engineer doing war duty as the clinic's head of security. One of Mr. Masic's duties is switching the generator's 130 kilowatts of power from one part of the clinic to another, and he needed to know

Dr. Lazovie's requirements. "We're down to five hours of diesel, doctor," Mr. Masic said. "What do you want, the elevators or the X-ray machines, or the sterilization and the elevators?"

Dr. Lazovic paused, ran some mental calculations and decided to forgo the buildings' elevators.

At 6:30 P.M., to save fuel for the morning, the generator was shut down. Hygiene in the clinic is at a

chronically low level. The lack of running water and of functioning laundry facilities has meant that huge piles of soiled and blood-stained linen pile up outside the clinic's garage, waiting for a truck with fuel to carry it to an incinerator. Unless relatives provide clean

sheets, patients lie for days or even the cries of the wounded and their weeks on the same sheets, or with

A UN soldier inspecting Saraievo's airport road Sunday after it was reopened.

# 'Serbs Will Not Be Cowed'

# Leader Sees Need for Separate State Within Bosnia

Radovan Karadzic, the leader of the "Serbian Republic" in Bosnia and the man regarded as the initiator of "ethnic cleansing," spoke recently with Robert L. Kroon for the International Herald Tribune.

O. With 70 percent of Bosnia-Herzegovina under your control and much of the rest occupied by Croats, why worry about Muslim domination?

A. First of all, we are ready to trade territory for peace. For the West the best solution would be to carve up Bosnia-Herzegovina into Serbian and Croatian parts. But I'd rather have a separate Muslim region. Our soul and identity can only survive through

separation. You cannot mix oil and water. The

## **MONDAY O&A** Muslims are getting more and more fundamental-ist, and even a small Muslim entity is going to be a headache for Europe.

Q. Why? A. President Alija Izetbegovic [of Bosnia-Herze-govina] is in caboots with radical Islamic states like Iran, Libya, Sudan, and always has been. He is a fascist fundamentalist, who was jailed in 1947 inder Tito for his membership in the underground "Young Muslims" and his sympathles for the Grand Mofti of Jerusalem, Hitler's war-time Arab

We call it the "The Green Snake" of Islam. It is crawling westward through the Balkans via Tur-key, Kosovo, and Macedonia. Already Izetbegovic

has 5,000 Middle Eastern mercenaries fighting on his side.

Q. But ethnic cleansing seems to be the main tenet of your Christian defense strategy, so if the Security Council establishes a war crimes tribunal,

A. To save people from the hardships of winter is our first priority. We already have an understanding with the Croats to declare Sarajevo and other population centers open cities, so the people can get out. Most city-dwellers have relatives in the country, where there's lood, shelter and no fight-ing. Sarajevo should then be demilitarized, the troops withdrawn, and Serbian-UN, Muslim-UN and Croatian-UN police patrols put in charge of termitive in the archiver back security in the various neighborhoods.

Q. Since your country has always been a patch-work of Muslim, Serbian and Croatian communities, is ethnic cleansing the first step in relocating people in new constituent parts? A. First of all, the Muslims have done quite a bit

of ethnic cleansing of their own. Second, yes, there will be relocations. We are willing to give the Muslims territory, in the center. Then people will do their own ethnic or rather, religious, relocation, by selling or exchanging property or whatever. On this point we have basic understanding with the Croats, if no formal agreement yet, because the Muslims would accuse us of a sell-out. The only fighting now is along the future borders that are taking shape. Here in Geneva we are already

talking about maps. Q. Are you satisfied with Cyrus Vance and Lord Owen as mediators?

A. They have a tough job, but they are doing it well. Their task would have been easier if the EC hadn't been forced by Germany into hasty recognition of Bosnia-Herzegovina. We were well on the way to a constitutional deal. If the West decides to recognize Macedonia's independence there will be war there, too. So in a way the EC can thank Greece for objecting to the name Macedonia, and blocking recognition. Q. And Kosovo?

A. No problem there. If the Muslims rise up in osovo they'll be crushed in 10 days.

# Shellfire **Knocks** Out Sarajevo question **Flour Mill**

New York Thnes Service SARAJEVO - The Bosnian capital appeared to have lost the use of its only flour mill Sunday after heavy artillery attacks, a po tentially serious blow to a city in which many of the 400,000 resi-dents have survived for months mostly on bread and pasta.

A huge yellow cloud of what ap-peared to be grain and flour burst from the mill at mid-morning after Serbian forces fired volleys of tank, anti-aircraft and artillery rounds at targets across the city. Mill officials said that essential machinery and a number of silos had been de-stroyed, and that flour stocks for the city's last major bakery would be exhausted within 36 hours.

The attack on the mill was part of a daylong onslaught in which at least 20 people were killed and more than 130 wounded, including at least a dozen people who underwent amputations of arms and legs wounded by exploding shells.

How the city would cope without bread from the bakery was not im-mediately clear. Bosnian officials called an emergency meeting that was attended by the United Nawas antended by the Onited Na-tions military commander for Sara-jevo, Brigadier General Hussein Ali Abdul Razek of Egypt. At the meeting, also attended by mill offi-cials, the government appealed to the UN commander for flour from UN stocks outside the siege lines.

"In a day and a half from now there won't be any bread or maca-

roni in Sarajevo," said Dinko Mes-kovic, a deputy director of the mill. Other officials acknowledged that the situation was serious, but said that bread from the bakery had been going mainly to institu-tions such as hospitals, refugee centers, government buildings and army barracks. Many families have been baking their own bread from private reserves of flour or from flour distributed through centers

that give out UN relief supplies. The apparent loss of the mill was a further blow to a city already deeply demoralized by the collapse of other services. Electricity and running water, available only sporadically since June because of Serbian attacks on power lines, have

been cut off completely for a month.

Pledges by the Serbian leaders that they will allow all the broken power lines to be repaired, and cease all further attempts to use utilities as weapons in the siege, have so far gone unfulfilled. The privations of life without electricity. for cooking or heating or light after dark, and without tap water for bathing and cleaning, have been compounded by countless other shortages as the city's reserves are

the less violent weeks of the siege,

# Hopes Fade for New Quebec Plan

OTTAWA (Reuters) — Canada's latest attempt to settle the Queber separatist issue appears headed for defeat in a national referendum Oct

WORLD BRIEFS

Opinion polls show that support for constitutional changes painstak. ingly negotiated over the past year has slumped from half of the Canadian electorate to less than one-third since campaigning began a month ago.

Opposition now exceeds 40 percent nationwide, according to two independent polls published on Saturday, and the unity deal faces almost certain defeat in French-speaking Quebec as well as in the western provinces of Alberta and British Columbia.

# Gunmen Kill 2 in Abu Nidal's Group

TYRE, Lebanon (Reuters) — Gummen killed two radical Palestinians in southern Lebanon on Sunday, apparently to avenge the killing of a Palestine Liberation Organization military commander a few hours earlier, security sources said.

The victims were officers in the Fatah Revolutionary Council, which is headed by Abu Nidal and which broke away from the PLO in 1973. The two men died after being shot in Sidon, 40 kilometers (25 miles) south of Beirut, the sources said.

On Saturday night a local commander of El Fatah, the PLO's largest guerrilla group, was shot and killed in a Palestinian refugeo camp near Tyre, south of Sidon. The sources said the officer was a former member of the Fatah Revolutionary Council who had defected to the PLO group,

# Hanoi and U.S. Advance on MIAs

HANOI (Reuters) — Foreign Minister Nguyen Manh Cam of Vietnam said Sunday that Hanoi had reached agreement with a senior U.S. delegation that sought greater cooperation in discovering the fate of American servicemen missing from the Vietnam War. It was unclear what agreement was reached, but Vietnamese sources said earlier that the U.S. delegation had requested more access to

Victnamese military documents that might show what happened to servicemen who never returned home. The U.S. delegation, led by General John Vessey, a special presidential envoy, arrived here Saturday.

# Northwest Somali Clan Accepts UN

MOGADISHU, Somalia (Renters) — The clan faction controlling northwest Somalia on Sunday agreed to the deployment of United Nations troops to guard relief operations, UN officials said. Clan elders and leaders of the Somali National Movement, the separat-

they had agreed to allow troops to be stationed in the port of Berbera, the UN said in a statement. "A formal agreement will be signed in the coming days," the statement read. days," the statement read.

Clan leaders in some other areas are still resisting deployment of UN guards. A Mogadishu-based warlord, General Mohammed Farrah Aidid, aid Saturday that he did not want any foreign forces other than 500 Pakistanis who arrived in the capital last month. Instead, he wants the UN to pay for a 6,000-strong police force under his control.

# Fischer Wins and Draws to Lead 8-4

BELGRADE (Combined Dispatches) - Bobby Fischer and Boris Spassky played to a short but sharp draw Sunday in the 22d game of their \$5 million chess rematch.

In their first game of the weekend, Mr. Fischer wore down Mr. Spassky in a grueling duel Saturday to win the 21st game and take an 8-4 lead. In a game stretching over 7 hours and 45 minutes, Mr. Fischer, playing white, rocked his opponent early on with a novel 8. g3 against the Sicilian Defense.

Experts watching the match said the end game on Saturday, unlike much mediocre play between the two former world champions, was one (AP. Reuters) for the textbooks.

# TRAVEL UPDATE

Malaysia is willing to buy radar equipment immediately from anyone to help restore normal flight operations at the fire-damaged Kuala Lumpur International Airport, Transport Minister Ling Liong Sik said Sunday. He said it would take about three months to obtain a replacement for the French-made radar equipment destroyed in a fire Thursday in the control tower.

Mastercard has announced that it will provide its cardholders with emergency aid and other services free at 1,600 offices of the Thomas Cook Group in 120 countries. Cardholders can report lost or stolen cards, get hours in the U The bombing that destroyed the They can also get air tickets validated or rewritten and make emergency phone calls or send telex or fax messages from Thomas Cook offices without a charge beyond the cost of the call fax or telex. (NY7) mill and blasted apartment blocks and other sites followed a week that without a charge beyond the cost of the call, fax or telex. UN headquarters described in one of its daily bulletins as "less tense," This Week's Holidays meaning that Serbian attacks, and Bosnian efforts to break through the besieging forces, had resulted in fewer casualties. But even in one of

families, doctors and nurses call for no sheets. intravenous drips and resuscitation equipment. They rush down corridors to an operating theater that is Lazovie was in the intensive care used for dozens of operations, many of them amputations, on the clinic's busiest days.

Sometimes, dead patients lie for hours beneath bloodstained sheets, the trolleys that carry them left aside in the haste to save the living.

In one of Dr. Lazovic's 24-hour shifts last week, the clinic regis-tered its 12,000th patient since the war began, a 39-year-old man with severe mortar wounds. Recordscorping nas suffered, along with much else, so nobody was sure how

Lack of food may be the most serious problem. At lunchtime, Dr. unit checking on an infection in what remained of the right leg of Adzul Cosic, 39, a coal miner. Mr. Cosic, who had been hit by a mortar shell fragment, was in obvious pain. Dr. Lazovie decided to schedule a fourth operation on the stump of his leg. In the meantime, he

urged the grimacing man to try to take some food. That food was on a

trolley near the bed: a cup of cold

tea, a slice of hardened bread and a

A. We are getting all the blame, and the Muslims go scot-free. But the state of war in Bosnia was declared by Izetbegovic, not the Serbs. The Inter-national Committee of the Red Cross and the UN refugee organization have visited our POW camps, but they have no access to Muslim camps. The terrorism was started by the Muslims. Q. Why do your gunners lay waste to Sarajevo? A. Everybody knows there are Muslim artillery positions in the hills as well. And 70,000 Serbian

hostages in Sarajevo are permanently terrorized by Muslim snipers. Our people cannot stand it, so once in a while our artillerymen get mad and shoot hack.

Q. With winter imminent, what do you propose to save the lives of hundreds of thousands of civilians in Sarajevo and elsewhere?

The Serbs won't be cowed, no matter what the world says or thinks. Some 700,000 Serbs were annihilated during World War IL We were a ma-jority in Bosnia-Herzegovina before 1939 and we still own most of the land.

The Balkans is not like the U.S. or Switzerland. It's a melting pot that never melted, despite a succession of foreign occupiers, Ottomans, Austro-Hungarians, Nazis or Tito's Communists. So it's wrong to talk about ethnic conflict, in the first

place. It's a religious and cultural problem. The Serbs will not be cowed. If we don't get our Serbian state, within or without a Bosnian confedcration, 12 million Serbs will stand united before the world. Send in 300,000 peacekeepers, it won't help. History, terrain, and Serbian fighting prow-ess exclude a Gulf War scenario.

# Last Debate **Amid Bleak** Outlook

By Edward Walsh and Ann Devroy

Washington Post Service WASHINGTON - The presidential campaign entered its cli-mactic stage on Sunday with President George Bush facing what is widely regarded as his last, best hope of salvaging his presidency in the final debate with Governor Bill Clinton and the independent Ross Perot on Monday night in East

Lansing, Michigan, For Republicans, the political landscape going into the cam-paign's last two weeks is bleak. According to public opinion polls and the Clinton campaign manager, David Wilhelm, the Democratic nominee is ahead or competitive in every traditional battleground

For now, his campaign has forced President George Bush and iovernor Bill Clinton to focus more of their attention on fiscal sues. Mr. Perot's presence at Thursday night's debate cansed Mr. such and Mr. Clinton to engage in a serious discussion of the conomy, according to aides to the major-party candidates. "Perot is refocusing the attention on the issues facing this nation," aid Avis LaValle, a Clinton spokeswoman. Torie Clarke, Mr. Bush's pokeswoman, suid: "Perot has shifted the debate from the state of he sconomy to what are you oring to do about if And that gives us state, where presidential campaigns are decided. States where Mr. Clinton remains in the running include such historic Republican bastions in presidential elections as Florida and Mr. Bush's home state of Tex-

(LAT)

to his aides. His task, both in the debate Monday and in a whirlwind last stretch of campaigning, is to "provide reassurance to people who have basically turned off George Bush at this point, both his

campaign and his presidency, but are still uncertain about Bill Clin-ton," Mr. Wilhelm said from Little Rock, Arkansas. "There will be millions of voters watching the debate who have to a

certain extent made that judgment of George Bush and will be watching Bill Clinton to see if he is ready from day one to be president," he added. "Is he in command? Does he command the stage?" Mr. Clinton, speaking to report-ers outside a church where he at-

tended a service Sunday in Detroit, said he expected another personal assault from Mr. Bush and characterized it as "really sad to me." "He can't run on his record or his

vision for the future so all he can do is tear me down," he added. In Washington, meanwhile, se-

nior administration officials expressed exasperation at calls from Republicans around the country for the president to go sharply on the attack in the final debate. The officials arguing that while Mr. Bush would be more aggressive, attacks such as those launched by Vice President Dan Quayle in his

debate were alien to Mr. Bush.

But Clinton operatives disputed

that assertion, and no public poll

# **'Outsider' Theme in Senate Races**

# But Strategy Isn't Foolproof in Open-Seat Contests

By Helen Dewar

Washington Post Service WASHINGTON — Following is a summary of how some open-seat races for the U.S. Senate are shaping up:

California: In the race for the seat being vacated by the Democrat Alan Cranston, the commanding lead held by Representative Barbara Boxer, a Democrat, since her surprisingly strong primary victory in August has withered. She is still regarded as the favorite to defeat Bruce Herschensohn, a Los Angeles television commentator. Ms. Boxer's lead was cut by half after Mr. Herschensohn ran a barrage of advertisements focusing on congressional perks, including her 143 House bank overdrafts.

Colorado; Terry Considine, a former Republican state senator and leader of the state's termlimit movement, was knocked off stride when Senator Timothy E. Wirth, a Democrat, decided not to seek a second term. Mr. Considine now faces Representative Ben Nighthorse Campbell, a more conservative Democrat, Mr. Campbell's unorthodox and highly individualistic resume - he makes jewelry, wears his hair in a ponytail and he would be the Senate's only member with an Indian. heritage — complicates this year's favorite anti-insider strategy for challengers. His big early lead has narrowed, but he remains the favorite.

Idaho: Although it has not elected a Democratic senator in 18 years, Idaho is staging one of the country's closest races for the seat being vacated by Steven D. Symms, a Republican who appeared vulnerable to personal as well as political attacks before he decided to step down after two terms. The Republican mayor of Boise, Dirk Kempth- by Brock Adams "He's not a pit bell, and if he

orne, has been running a steady but small lead over Representative Richard H. Stallings, a Democrat. Illinois: In one of the biggest electoral surprises this year, Carol Moseley Braun, a Democrat, catapulted over two white male opponents to win the Democratic nomination in March, defeating the incumbent, Alan J. Dixon. For the next six months, she soared over her Republican opponent, Richard Williamson, a former Reagan administration aide. But she recently stumbled over a controversy involving her handling of a royalty payment to her mother, whose care in a nursing home is being financed by Medicaid. Polls indicate that the race has tightened.

North Dakota: Senator G. Kent Conrad, who is running in a December special election to fill the seat vacated by the death of Senator Quentin N. Burdick, and Representative Byron L. Dorgan, a six-term Democrat, who is running for Mr. Con-rad's old seat, have commanding leads over their Republican rivals,

Utah: Democrats look loogingly at Representative Wayne Owens as a long-shot prospect to succeed Senator Jake Gam, a retiring Republican, but Robert Bennett, a wealthy Republican busi-nessman who upset the favorite for the party's nomination, is running strong on a classic anti-incumbent "outsider" theme. The latest poll shows Mr. Beanett, the son of a former Utah senator, Wallace F. Bennett, running about 20 points ahead of Mr. Owens,

Washington: The self-styled "mom in tennis shoes," Patty Murray, a Democratic state senator, is hanging in there. She is holding a diminished but still substantial lead over Representative Rod D. Chandler, a Republican, for the seat being vacated

# Health Insurance: Imprecision Makes **Opponents Similar**

New York Times Service WASHINGTON - President George Bush and Governor Bill Clinton both say they will rein in health costs and provide health insurance for 35 million uninsured Americans without raising taxes for anyone.

But experience suggests that such promises are unrealistic, that health costs eventually explode even if they are artificially controlled and that some new taxes are likely if the government guarantees insurance coverage for all.

In some ways the two candidates have radically different ideas about how to achieve their goals. Mr. Clinton says he has "the guts to control costs" by regulating health care and health insurance. Mr. Bush prefers free-market solutions and says he does not want to create a new federal bureaucracy to regulate medical prices.

But both are vague about details. Neither says how he will finance his plan. And both seem to underestimate the difficulty of passing legislation to revamp the system. Mr. Bush and Mr. Clinton, like Ross Perot, the independent candidate, agree that there is an urgent

need for action. The Congressional Budget Office estimates that under the current system, national spend-ing on health care will rise from \$808 billion this year to \$1.7 trillion in the next eight years. As part of that, spending on hospitals, doctors and nursing homes will more than double, the budget agency says. The rest of the economy is ex-

pected to grow more slowly. So health care, which now represents 13.6 percent of the nation's total output, will account for 18 percent in 2000, the budget office said.

There are deep philosophical dif-ferences between the Bush and Clinton plans, but they agree in some areas. Both would build on

which provides coverage to most Americans through employers, rather than seek to replace it wholesale, as others have suggested. Both want to encourage the use

of health maintenance organizations and other forms of managed

made that a campaign issue. But both are vague about important details, for reasons suggested technology that Americans now by Uwe E. Reinhardt, a professor take for granted.

of political economy at Princeton. "Politicians who articulate fully and forthrightly their ideas about reform of the health-care system run the risk of political self-immolation," he said. Hordes of lobbyists for doctors,

hospitals, drug companies and old people, are ready to challenge any proposal that cuts them. All proposals, as Mr. Reinhardt said, imply "some redistribution of privi-

Page 3

ege among Americans." The proposals are drawing more attention than in the past because health care has, for the first time, emerged as a major issue in a presidential election, and because Con-

gress is eager to tackle it. Millions of people in middle-income families have either lost health insurance or fear they will lose it; many others find themselves paying large sums for insur-ance premiums and medical expenses not covered by insurance. With costs rising twice as fast as other prices, health benefits are a central issue in most labor-manage ment negotiations. Economists say

workers eventually bear most of the cost of such benefits as health care consumes a bigger share of their

total compensation package. Both Mr. Bush and Mr. Clinton say they will make greater use of bealth maintenance organizations, which provide a wide range of med-ical services in return for a fixed monthly payment. Both endorse "managed competition" as a strate-gy to overhaul the health-care mar-ket. Under this concept, consumers

shows the margin that narrow. The latest, a CNN-USA Today poll is-sued Sunday, put Mr. Clinton's lead at 13 points. A Republican who spoke with the president during the weekend described Mr. Bush as "determined to fight until the last vote is cast," NEW YORK - When Albert J. Menendez heard President Bush

New YORK — When Albert J. Menendez heard President Bush , child the Democrats in August for failing to mention God in their party's 1992 platform, be thought it a strange test in a nation whose child principles include the separation of church and state. So Mr. Menendez, a researcher, began to read the Republican and the wards platforms of the last 136 years, looking for references to the Output platforms of the last 136 years, looking for references to

the Creator and Divine Providence, too. He found the words absent from the platforms of both parties far more than it was present. In fact, of the 70 platforms, only 16 Winentioned the deity. Three-quarters of those references came in Republican platforms, and all 16 were made in the last 50 years. God has been a regular in the Republican platforms during the Reagan and Bush years. In 1972, when Richard Nixon ran for re-tection, there was no mention of Him. The last time God showed up. in a Democratic platform was in 1960, when the platform referred to "God's earth."

The deity played little role in the early days of either party. Until 1944 there was only one oblique reference in Republican platforms -- that was to "Providence" in 1876. The Democrats did not invoke God's name until 1924 in a reference to Latin America. "God has Tade us neighbors," the platform said. Mr. Bush's assertion that the Democrats this year "left out three simple letters: G. O. D." could take been applied to the Republican platform in 1860, when Lincoln "arried the party's banner to its first Presidential victory. (NYT)

# He Offered Tax Breaks to Keep a Company in Arkansas

By David Maraniss Washington Post Service LITTLE ROCK, Arkansas One day in 1985, Governor Bill Clinton telephoned the chairman

of International Paper Co. at its corporate headquarters in New York and spent an hour hashing out details of a huge tax break designed to deter the company

from moving its operations out of Pine Bhuff and Camden, mill towns in south Arkansas. As Mr. Clinton worked the long-

distance deal from the Arkansas capital, he was flanked by an economic development side urging him to strike the bargain and a budget analyst pleading, "Don't give up the store."

The warning by International Paper had come at a bad time for dustrial Development Commis-sion, and Mr. Martin, who left state Mr. Clinton, who was drafting an economic package aimed at pulling government to run the Winthrop his rural state out of a recession Rockefeller Foundation, still disthat had resulted in a 10.1 percent. agree on the merits of the deal. unemployment rate in 1983. As well, about 35 percent of the The tax credit led to the mod-

below the presidential level and injob growth. Many of those traits came into cludes the fear that Mr. Bush will be written off in the final days of play during the International Paper

the campaign. "If there is a sense out there on His key economic development or around Nov. 3 that George Bush can't win, I really worry about what can happen to us on turnout," said Eddie Mahe, a veteran Republican political consultant. "We all lived through '74. Republicans didn't vote in '74. Republicans don't switch, they stay home." The Democrats were an emo-

tional mirror image of the Republicans over the weekend, reveling that the debates seem to have left Mr. Cinton's status as the frontnumer intact, but almost superstitionsly fearing to look ahead two

to be extended to other industries that met the same guidelines. The revenue system already was riddled with business tax breaks that pre-vented the state from collecting

President George Bush and the namillions of dollars in taxes. tional Republicans, they say, are Mr. Clinton chose the tax break making a specious argument when they claim that Mr. Clinton has led route. In his bargaining with the paper company, he accepted a 7 percent manufacturer's investment his state to economic decline.

The record shows that job sales tax credit - 2 percent higher growth in Arkansas has increased than Mr. Harrington had recomfar beyond the national rate in the three full years since Mr. Bush took 'mended --- but in return won a nodernize that the company would modernize the Pine Bluff plant and not close the Camden facility for at office. Per-capita income, while still only 77 percent of the national average, has risen steadily. And the least two years. The paper compa-ny eventually spent \$278 million on the Pine Bluff plant; the facility in Canden is still operating. Seven years later, Mr. Harring-ton diverse of the Advance In jobless rate has dipped below the national average. The work force has become better educated; The ton, director of the Arkansas In-

percentage of Arkansans graduat-ing from high school has increased by half, from college by one-third. And the state tax burden, while still favoring the rich and large corporations, has remained stable.

Established in 1966, these innovative programs make It possible for you to sam a degree from a major American university while working full time - even if your job hnohves extensive travel or oversees location.

The format combines required residence periods with home study. During the residencias (two or three weeks per year on the Syracuse, New York, campus, depending upon the degree program) you receive personal instruction from senior Syracuse faculty. During the self-paced, home-study component, you can confer with your professors by telephone or mail.

The following degrees are offered: • Bachelor of Arts in Liberal Studies

Bachelor of Science in Business Administrati Bachelor of Science in Restaurant and Foods Management Management Bachelor of Science in Criminal Justice

# A Reminder to Disarm

Ross Perot and Bill Clinton are right to remind George Bush that he has not yet rid the model of Push that he has not yet rid the world of Russia's most dangerous nuclear weapons. Given the disarray in Russia, merely reaching agreement to cut nuclear arms is not enough, it is necessary to

Page 4

begin disarming. To their credit, President Bush and President Boris Yeltsin of Russia made a commitment in mid-June to make still deeper cuts than the START treaty. The mitment would ban all land-based CON multi-warhead missiles and eliminate all silos for firing the dreaded Russian SS-18s, which carry 10 warheads. It would reduce the warhead total on each side to between 3,000 and 3,500, down from today's levels of 11,000-plus. But Senator Al Gore startled Vice Presi-

dent Dan Quayle during their debate last week by reminding him that a commitment to make deeper cuts is nor the same as a formal agreement to do so. Neither Russia nor the United States seems likely to renege on the commitment, but they have yet to turn it into a treaty. What is holding them

up? Not much that cannot be worked out --the sooner, the better.

Washington was slow to draft the accord for deeper cuts, and Moscow has been slower to respond. The 17-page American draft, which builds on the START treaty, was given to the Russians in late July. They have yet to return it. But they have asked about changing the procedures so that they can costly new silos and missiles.

Once Washington is satisfied that these are the only changes Moscow wants, a satis-factory accommodation can be reached.

Instead of destroying the SS-18 silos, Russia wants to be able to reuse them for launching single-warbead missiles. The United States can accept that, provided it assures itself that the silos cannot be used by SS-18s. There are two ways to accomplish that: Convert the silos so they are physically incapable of launching the mammoth SS-18s, or require the Russians to destroy all their SS-18 missiles, some-thing they would otherwise not have to do under START's rules.

Moscow would also like to turn its SS-19s into single-warhead missiles by removing five of the six warheads now loaded on them. That would be acceptable only if Moscow redesigned the SS-19 missile.

Actual disarming will not begin until all the other signatories join the United States in ratifying the strategic arms treaty. Russia and Belarus are about to ratify, and Kazakhstan already has, but the other nuclear republic, Ukraine, is slow to fulfill its pledge. It will jeopardize Western ties and aid if it does not do so expeditionsly. The American candidates have said a lot

that is debatable. There should be no argument about their reminder to disarm. -THE NEW YORK TIMES.

# **Deadline in Cambodia**

Yes, Address the Issues

It is not always true that the people are come taxes, a gasoline tax increase, a cap

shead of the politicians, but it was at the on the mortgage interest deduction, tax-

Faced with a delicate test of its credibility, the United Nations Security Council made exactly the right call on Cambodia last week. The Khmer Rouge faction has been openly defying the peace treaty it signed last year by refusing in demobilize its guerrillas and barring UN monitoring and voter registration teams from areas it controls. As the price for compliance, it seeks revisions to the agreement, Allowing the Khmer Rouge to write their own rules would undermine the United Nations' most ambitious peacekeeping effort to date. Yet ton aggressive a response could shatter the international consensus pushing for peace in Cambodia.

The council has now firmly committed itself to bolding free, internationally supervised elections on schedule next May. Unless the Khmer Rouge begin cooperating by January, they will effectively exclude themselves from the vote. The council also agreed to consider further steps, like clamp-ing an economic embargo on Khmer Rouge territory, if needed to protect the vote. Americans may wonder why even this much patience should be extended to a group that murdered a million Cambodians in the late 1970s. There are at least two good reasons: Not all of today's Khmer Rouge

fighters are genocidal murderers; and international cooperation offers the best hope of

containing those who are. Cambodia has been at war for decades. Some now in Khmer Rouge ranks are there mainly hy accidents of geography or imper-atives of physical survival. Reintegrating these people into the elections will make it easier for the new government to survive the United Nations' departure,

The Khmer Rouge hard core around Pol Pot has remained a military threat mainly because of arms from China, delivered through Thailand. This core also drew diplomatic support from Southeast Asia and, shamefully, the United States. Inclusion of the Khmer Rouge in the peace settlement brought commitments to cut off this out-side cooperation. China, Thailand and Indonesia now seek to persuade the Khmer Rouge to end their boycott.

By proceeding patiently, the Security Council maintains this crucial Asian support. By insisting on the election timetahle, it keeps faith with factions which have fulfilled their treaty obligations. And by threatening an embargo, it warns Khmer Rouge leaders against mistaking patience for impotence. - THE NEW YORK TIMES.

# He Returned 'With More Courage to Go On Fighting'

I Gustemala. My life has been a long one. Things have happened to me as in a movie. My parents were killed in the repression. I have hardly any relatives living. It has been the lot of many, many Guatemalans.

We were a very poor family. My parents worked cutting cotton, cutting coffee. Two of my brothers died on the plantation. One of them got sick and died. The other died when the landowner ordered cotton sprayed while we were in the field. My brother was poisoned and we buried him on the plantation.

My father was a catechist, and in Guatema la a catechist is a leader of the community, ching the Gospel. We began to evolve in the Catholic religion and became catechists.

We grew up -- and really you can't say we started fighting only a short time ago, because it has been 22 years since my father fought over the land. The landowners wanted to take away our little bit of land, and so my father fough for it. So be went to speak with the mayors and judges in various parts of Guatemala.

For many years he was tricked, because he did not speak Spanish. None of us spoke Spanish. So they made my father travel all over to sign papers, letters, telegrams, which meant that not only he but the whole community had to sacrifice to pay the expenses.

WASHINGTON - Ambiguity is not my thing; 1 am of two minds about even using the word "ambivalent." Yet here am I, a life-

long Republican, a card-carrying con-servative, a right-wing pundit with foursquare opinions on anything you can name — with scarcely two weeks to go before a national election — and

not yet sure about which hole in the

Other libertarian Republicans are

in the same boat. Should we do the

with the antelopes," as loyalty-first Richard Nixon used to say?

Or should we cast "a clothespin

card to punch for president.

#### By Rigoberta Menchu

The writer received the Nobel Peace Prize on Friday for her fight on behalf of Indians and human rights in Guatemala. This text is adapted from an autobiographical chapter in "You Can't Drown the Fire: Latin American Women Writing in Exile," published in 1989.

My father was imprisoned many times. First be was accused of causing unrest among the population. When he was in jail, the army kicked us out of our houses. They burned our clay pois. It was really hard for us to understand this situation.

Then my father was sentenced to 18 years in prison, hut we were able to work with lawyers to get him released. After a year and two months, he returned home with more courage to go on fighting and angrier because of what had happened. A short time later he was tortured by the

landowners' bodyguards. Some armed men took him away. We found him lying in the road, about two kilometers from home, barely alive. The priests had come out to take him to the hospital. He had been in the hospital for six months

when he heard he was going to be taken out and killed. The landowners had been dis-

In 1977 my father was in jail again. The military told us it didn't want us to see him, because be had committed many crimes. From lawyers we learned be was going to be executed. Many union workers, students, peasants and some priests demonstrated.

My father was freed, but he was told be was going to be killed for being a Communist. In 1979, five armed men, their faces covered, idnapped one of my little brothers. He was 16. Since my father couldn't go ont, we went with my mother and members of the commumity to make a complaint to the army, but they said they didn't know anything. We went to City Hall, to all the jails in Goatemala. My mother was very upset. It had taken a lot for my brother to survive, and so it was very hard to accept his disappearance. At that time the army published a bulletin

saying that they had some guerrillas in their custody and that they were going to punish them in public. My mother said: "I hope to God my son is there. I want to know what

We walked for one day and almost the whole night to get to the town. Hundreds of soldiers had gathered the people to witness what they were going to do. After a while a

cussing it loudly. We had to find a private truck arrived with 20 people who had been tortured in different ways.

tortured in different ways. Among them we recognized my brother. c had to calm my mother down, telling her that if she gave berself away she was going to die right there for being family of a guerrilla. We were crying, but almost all the rest of

the people were crying also at the sight of the tortured people. The army had palled my little brother's fingemails out, cut off parts of his ears and other parts of his body, his lips, and be was covered with scars and swollen all over.

Among the prisoners was a woman and parts of her breasts and other parts of her body were cut off.

An army captain gave a very long speech, saying that if we got involved with commu-nism the same things would happen to us. Then be explained the various types of torture they had applied to the prisoners.

After three hours, the officer ordered the troops to strip the prisoners and said, "Part of e punishment is still to come." He ordered them tied to some posts. The

people didn't know what to do and my mother was overcome with despair. And none of us knew how we could bear the situation. The officer ordered the prisoners covered with gasoline and they set fire to them, one by one. The New York Times.

# Why This Conservative Isn't Sure He Can Vote for Bush

By William Safire and fuzzes his positions but is shrewd and gritty enough to present himself as wholly unlike past Democratic losers. right is this: Republicans assume that in his heart he is a moderate, a centrist -words that fall gently on the cars of

Mr. Bush --- a man with wide mood swings and an inclination to gamble independent voters, but which to even the reasonable right mean "weaseling pragmatist devoid of principle." At the same time, in his efforts to win over a far-right base that has never been his own, Mr. Bush approves (but claims not to have read) the uncompromising platform demanded by evangelical activists and -at the crucial lickoff of the campaign — sent out exclusionary signals under the ru-bric of "family values" that infuriated

the main body of the party. Result: The rightcons right thinks of him as a vehicle to be used, while

That accounts for the crack "His support may be narrow but it runs shallow." It explains the lack of a hardy band of "Bush people" to ener-

times, and the paucity of right-wing punditry to defend him in his hour of inderdoggery. Nobody ever says "Let Bush be Bush," because nobody can

Who are the near-right conservatives considering defection? These are Republicans who shy away from what is left of the Rockefeller wing but cannot identify with the delegates who dominated the Houston convention.

Bush be Bush' because

that here at home the president was inattentive, causing the deficit to swell despite the tax increase. But if Scarlett O'Hara had it right,

The first answer, drilled into living rooms from our worst convention since the short-lived triumph of Barry

Goldwater in 1964, was no. For us, the Honston Republican convention of 1992 was even more off-putting than the San Francisco Democratic convention of 1984. Pat Buchanan, the protest candidate resoundingly defeated by Mr. Bush in all the primaries, declared "religious war" and seemed to deliver our party's message: No untrue belie need apply. Instead of asserting a congenial diversity, we touted a lock-step unity, during which the party displayed the basest of its base.

How did the disaster of Houston. appen? "The convention got out of hand," one of its many anguished planners tells me. "We had in mind. stressing the good family values, pos-itive stuff that nobody can complain

Sec. 1

on assuming a dual political person-ality — is the underlying issue for my lonely crowd. We know that the Bush who campaigns is not the Bush who governs. His economic mind-set ---not unduly to interfere with the free market system - is our own, even in a dreary period of breath-catching after

That is the way the Bush candidacy is being flogged as the campaign en ters the home stretch: not so much for

Thursday night. The serious studio audi-ence of undecided stand-ins for a part of the electorate that plainly feels itself disserved rebuked all three of the candidates for the quality of the campaign thus far. In doing so they performed a service.

The complaint of the audience had to do in part, but only in part, with negative campaigning. Thus one early questioner drew a distinction between the public's needs for better housing, crime control, "you name it," as distinct from what he called "the wants of your political spin doctors and your political parties." "Can we focus on the issues and not the personalities and the mud?" he asked. Of course they could and should and would and had, the candidates said.

This part of the complaint pinched President George Bush the most, since the Republicans appear to have decided that Bill Clinton's "character," as they are pleased to call the caricature that they have created, is their best hope for winning and the issue they need to press. The president did a little of that, but less than had been expected, and ended up being pretty defensive about it. But the other and more important half of

the audience's complaint went a step beyoud. "Why can't your discussions and proposals reflect the genuine complexity and the difficulty of the issues?" one questioner asked. Why, indeed? What a revolutionary standard that would be.

Mr. Bush has never been good at this kind of complexity - not, at any rate, in the domestic sphere - and has been further hampered in the campaign not just by a reluctance in offend but also by a determination tion to please in the form of further tax cuts that the government cannot afford and Mr. Bush can think of no way to finance. He lives

in a programmatic never-never land. Ross Perot, having based his entire campaign on the unwillingness of the other candidates to confront "the genuine complexity and the difficulty of the issues," has also shown a reluctance to discuss them in prime time, and had begun Thursday night to wear out his welcome by doing little more instead than again deploring the na-tion's problems, down-home style. In a paid half-hour on Friday night, he finally did begin to lay out his proposals for balancing the budget. Many are solid - higher in-

of Social Securit benefits. Others are still pretty vague, as when he discusses health care. But he performs a useful service even at this late date in describing and helping to legitimize the kind of steps that sooner or later the government will have to take.

Bill Clinton remains in our view the most scriously substantive of the candidates, a policy wonk, as we have said before; Thurs day night was made to order for him. But he, too, has a problem on this score, which will be all the greater if he retains his lead in the polls for the next two weeks and wins. He has made in the course of his campaign both some contradictory promises and more promises than he could likely afford; they are the Democratic reciprocal of Mr. Bush's proposals both to reduce the deficit and to cut taxes. Mr. Clinton says that as president be would seek first to stimulate

the economy through greater federal "investment" but also to reduce the deficit by half over the next four years (on which he could take some useful guidance from Mr. Perot). That is the contradiction. The more of either be did, the fewer resources he would likely have left for some of the other things he also wants to do - reform health care, for example, or refinance part of fed-eral aid m higher education. The "genuine complexity" that Governor Clinton has yet to resolve is which of his goals come first. -THE WASHINGTON POST.

#### Accounts in South Africa

The Indemnity Bill now shouldering it way through Parliament has all the hallmarks of the National Party of late: expedience, appeasement and shortsightedness. The measure [provides that] perpetrators of even the most grotesque political violence in the past need not have their crimes publiciv noted. To most people it looks sleazy. True, there can be no Nuremberg trials in a future South Africa. The fragile compromises on which a new government will have to survive would be shattered in the process. But there has to be a public accounting of some sort for the atrocities committed in the name of ideology in recent years - by all parties.

Vote for o spy on and destroy Vietnam War dissenters. The Iran-contra af-

fair arose because Reaganant true believers were hell-bent on finding

a way around congressional restrictions on arming the anti-Communist Nicaragnan rebels. Iraqgate, now rising from the glorious ashes of Desert Storm, begins to look like a Bush administration cover-up of its aid to Saddam Hussein before his attack on Kuwait. Foreign policy has turned presidents, their men and would-be presidents into liars. It is almost impossible to believe, for example, that President Ronald Reagan and Vice President George Bush did not lie about the Iran-contra scandal. How could they not know in 1986 that their aides were trading arms to Iran for Americans held hostage in Lebanon, and using the profits to finance the contras?

Lies about national security affairs have become so routine that Americans no longer seem interested in the truth. Perhaps they think the truth is that everybody is lying. They don't want to listen to another word from Mr. Bush about Bill Clinton's avoiding the Viet-

nam draft. They correctly see this trashing as a ploy by the Bush team to avoid talking about a dismal economic record. Nor can Ameri-

cans bear another Clinton "explanation" of his draft history. The politics of foreign policy has destroyed institutions, most notably the CIA. It has secret power and therefore a sacred trust to be above reproach, above politics. Time and again it has dishonored that unst. It has done so once again in the unfolding Iraqgate story. CIA officials have admitted withholding vital information from the court in the trial of a bank executive for making illegal loans to Iraq. According to the agency, the Justice Department told it to withhold this evidence. How can Americans possibly trust these people, these once sa-

cred institutions? Even the State Department, which traditionally sidestepped election-year manure, has now got into the act. Republican rightwingers stimulated press inquiries about Mr. Clinton's student days abroad during the Vietnam War. To get that information "for the press" before the election, the department violated every rule of decency and its own strict proce-

dures. Its apology means little now. That venerated institution has been compromised. Presidents have so often abused

political ends that Americans hardbuilt at the practice any longer. In one breath, Mr. Bush wisely said he would cut back on dangerous arms sales to the Middle East. In the next, he sold billions of dollars in new arms to Saudi Arabia and Kuwait. He also recently broke a solemn pledge to China and made massive new arms sales to Taiwan.

Wonried about jobs, even Mr. Clinton kept his month shut. Did President Reagan make war on Grensda to save American lives or to blot out the story of U.S. Marines killed by terrorists in Leba-pos? Did President Bosh invade Panama for necessary national security reasons or to make himself look good at home? Is he shrinking from humanitarian duty to stop the slaughter in Bosnia mainly for fear that military intervention would cost him votes? What has become of foreign policy that Americans even ask such questions?

No wonder people hardly ques-tion the candidates about international affairs. For so long now have politicians and foreign policy ex-perts treated this always tricky enterprise as a political game and a blood sport that Americans no longer see the national interest and have lost interest. The New York Times.

**To Clinton** By Lon Cannon

T OS ANGELES - The hidden L danger for Bill Clinton in the repeated Republican attacks on his draft record and veracity is not that they will keep him out of the White House but that they will damage his capacity to govern. Repetitive political labels have a habit of sticking, particularly when

there is a grain of truth to them. Lyndon Johnson was dogged by suspicions that he was a political wheeler-dealer even when he was acting high-mindedly. Richard Nixon never escaped his hard-earned reputation as "Tricky Dick," and a majority of Americans accepted the darkest explanations of his conduct as the Watergate scandal unfolded. Ronald Reagan successfully deflected accusations that he was a potential "mad bomber" during

the 1980 campaign, but his strate-gists found it necessary four years ater to dampen the same fears. George Bush's abandonment of his "Read my lips" pledge not to raise taxes has been an enduring symbol of broken political prom

ises. The Democrats have cynically exploited this issue, masmuch as Mr. Bush broke his pledge by agreeing to a Democratic compromise that lowered taxes on the poor and raised them on the rich. But Mr. Bush does not seem to stand for anything, as Mr. Reagan said pri-vately at the onset of the campaign, and Americans are prepared to believe the worst about him.

Mr. Bush's campaign operatives knew they were selling damaged goods. With a cynicism that outstripped even Mr. Chinton's managers, they adopted the strategy of raising every imaginable doubt about the Democratic nominee's personal character in an effort to make him unpalatable to the voters. Americans are too recession-damaged and frightened of the future to be diverted from voting out the president by a discussion of Mr. Clinton's youthful escapades. But Mr. Cinton has given far too many explanations of his conduct for a neutral observer to be comfortable with any one of them. The label "Slick Willie" chings to him, even if

"Nothing passes," Chekhov wrote, expressing the view that all actions have consequence and are remembered in strange and telling ways long after they occur. This insight applies with special force to American presidents, who embody the hopes and fears of a nation. The Washington Post.

Page 5

#### An open letter to the Secretary-General of the United Nations.

Dear Mr. Secretary-General,

In a repidty changing world, the U.N. is playing an increasingly resurgent role. Daily, the U.N. works on e variety of tasks: peace and conflict resolution, humanitarian and disaster rollet, improvement of health of the Earth's environment and its population, relief of refugees. All the more reason. Mr. Secretary-General, for an efficient and competent staff, as you have said. But something is terribly wrong.

Just when we thought it was respectable again to work at the U.N. or one of its 20 related agencies, you, Mr. Secretary-General declare that many staff do not work. We hope these statements were not based on gossip, hearsay and political pressure from large donor countries, and that you can offer some hard evidence.

Sadly, however, we believe you can't. And that is why we consider your comment intolerable, incorrect and out of line with what a good manager would say.

The Staff of the U.N. does work and it works hard. Under the curcumstances, many risk their lives daily to better the lives of others.

For U.N. staff, it has been a deadly year. Violence and attacks have killed 10 U.N. staff in such scattered areas as Afghanistan, Cambodia, Croatia, Ethiopia, Irao, Kenya, Lebenon, Somalia, and Sudan. Many U.N. staff have been injured in the line of duty. In all, over 30 U.N. staff have been killed since 1973. Dozens are detained in countries around the world. Five have been abducted and are believed held as hostages. One U.N. staff person has been missing since 1976.

Yet our work continues. Indeed, around the world, 24-hours a day, the U.N. provides a "lifetime" for millions of people: refugees, sick and dying children, oppressed peoples, people denied their human rights. When conflict erupts, refugees fiee, or refief arrives, the U.N. is there. And everywhere the U.N. works, it needs staff.

That's why we agree, Mr. Secretary-General, with your statement that "the paramount consideration in the employ-ment of staff must be the need to secure the highest standards of efficiency, competence and integrity." We fully endorse your comment, Mr. Secretary-General, that "In order to attract and retain staff of such caliber, the organizations must be able to offer them adequate remuneration and other conditions of service." And we fully concur that this ideal is "still far from the first item adequate remuneration and other conditions of service." being realized.

You have stated that "over the past several years, the conditions of service in the United Nations system had been steadily erocled and had lost their attractiveness and competitiveness vis-a-vis those of outside labor markets, including some other intergovernmental organizations." Like you, Mr. Secretary-General, we believe this is "especially paradoxical at a time of renaissance for the United Nations, when the organizations of the United Nations common system were being requested to play an increasingly important role in solving international problems."

Mr. Secretary-General, we agree that the remuneration system of the U.N. must be "remedied on an urgent basis." How urgent? Recruiting and retaining high quality staff is already tough because the sateries and pensions, particularly for technical experts, lag some 30% behind the U.S. private sector. And why should we earn less than other international organizations such as the World Bank, the Organization for Economic Cooperation end Development and the European

We know some Member States haven't paid their assessments—arguing thet some staff don't work. And we also know some Member States say economic times are hard. But this doesn't really cut the mustard. The assessment being requested are small compared to global spending on other issues. And these same Member States always seem to find funds for the World Bank, the International Monetary Fund, and the European Communities.

It doesn't help if you go along with these arguments. Especially now, which we see as a pivotal moment in the future of the U.N. The international Civit Service Commission (ICSC), in its report to the U.N. General Assembly, has chosen to ignore your own specific requests regarding the inadequate levels of salaries and pensions of professional steff and will recommend changes in the way salaries and pensions of general Service staff are calculated, sending them plunging.

It is after all staff who make the U.N. work. But without good staff, how can the U.N. continue to develop bacity-needed new programs? Any effective manager knows, Mr. Secretary-General, how good staff will react to bad salaries and pensions. So how do we continue to provide good staff for the U.N.?

If you mean what you say, Mr. Secretary-General, you'll agree that the Commission's recommendations will seriously hobble your efforts to forge a new, improved U.N. How many staff-already underpaid and under appreciated-may leave the U.N., taking their experience with them, to avoid being accused of incompetence or laziness?

The 32,000-member Federation of International Civil Servants' Associations (FICSA) joins you in working for en improved and effective U.N. Yes, by all means let's effininate the dead wood. But more important, let's improve the conditions of service and make the U.N. system a competitive employer again. All we ask is that we be brought up to e competitive level of employment. Speak out in favor of the staff who get the work done. Show us you mean what you say when you declare "the organization has one wealth: you." We couldn't agree more. But when you will speak to the U.N. Ganeral Assembly in November, will you agree with your own words?

> Edward J. Freeman, President FICSA 220 East 42nd Street Suite 3102 New York, New York 10017 (212) 986-5013 Fax (212) 986-5019

# **INTRODUCING AT&T** WORLD CONNECT SERVICE. IT'S GOT THE WHOLE WORLD TALKING.

When you're outside the US, country to country phone calls haven't always been easy. Suddenly, with an AT&T Card, they can be. Introducing new AT&T World Connect<sup>®</sup> Service. Now when business takes you to any country where World Connect is available, dial the appropriate AT&T USADirect\* Service access number. You'll find it on the Sports page of this paper. In seconds, AT&T can connect you with any other country in the World Connect System. For more information, call AT&T collect at 412 553-7458, Ext. 611 AT&T World Connect\*\* Service. Now, the world's at your fingertips.

Each year we fly more

people than the largest airlines of Great Britain, Germany and France...combined. Perhaps one reason

is the remarkable service

our passengers enjoy.

Come Experience Travel That's

Anything But Ordinary.

two weeks after Angola's first dem-

ocratic elections, and with the

country's stability hanging in the balance, official final results of the

vote have been released. As expected, they show the two main rivals for the presidency will have to com-

José Eduardo dos Santos, the candidate of the leftist governing party, registered a surprisingly sturdy victory with 49.6 percent of the vote, but he failed to win 50 percent, enough to avoid a runoff

with the second-placed finisher. A rumoff date has not been set. Well behind was the former American-backed rebel leader, Jonas Savimbi, with 40.1 percent. An-

other former leader of an Angolan gnerrilla movement, Holden Ro-berto, won only 2.2 percent. The rest of the vote was divided among

eight minor candidates. In the parliamentary elections,

the governing party, the Popular Movement for the Liberation of

Angola, won a comfortable victory, with nearly 54 percent of the vote, compared with 30.1 percent for Mr.

compared with 30.1 percent for Mr. Savimbi's party, the Uniou for the Total Independence of Angola, popularly known by its initials in Portuguese as UNITA. Until now, Angolans have been relatively subdued as they awaited the final results, but with the re-lease of the prove on Saturday came

pete again in a runoff.

# In The Mind of a Terrorist

# ANC Bomber Tells of Planning '86 Beachfront Attack

By Bill Keller New York Times Service

JOHANNESBURG -- "So now tell me, what do you think about me?" asked the bomber, his dark eyes challenging through round tortoise-shell frames. This is a question South Africans often pose in one form or another after endeavoring to make themselves understood to outsiders.

Robert McBride, one of the most famous sabotears in the furtive military underground of the African National Congress, works harder than most South Africans to explain himself, since he finds that for those outside the liberation fraternity

what he did surpasses understanding. What he did is this: In June 1986, he taped together more than 100 pounds of explosives, at-taching a mine with a 15-minute timer as his trigger and swaddling this propulsive charge with bags of machine-gun bullets and metal scraps for shrapnel. He secreted his lethal contraption in the spare-wheel well of a powder-blue Ford Cortina, which he parked one Saturday night on a crowded beachfront esplanade in Durban.

The bomber was out of earshot when his device exploded into two busy white bars called Magoo's and the Why Not, killing three women, wounding, 69 people, and inaugurating a new, less morally fastidious stage in the war against apartheid.

"It was the first time the conflict in South Africa was brought home to white people," Mr. McBride recalled the other day, at liberty after six years in prison and, like the ANC itself, keen to convince that he has matured from bush soldier to citizen.

Last month Mr. McBride, 29, was freed, one of hundreds being let out in phases in a grudging government concession aimed at reviving negotia-

Mr. McBride is descended from Scottish, Irish, African and Malay ancestors, making him by apartheid's cerie lights neither black nor white but

"colored." He grew up in Wentworth, a grim mized-race township. When a friend recruited him into the ANC army - Umkhonto we Sizwe, or Spear of the Nation he went eagerly to a camp in Botswana to study

clandestine warfare. He smuggled weapons, then graduated to what the ANC calls "combat missions." He blew up electrical substations, water mains, oil pipelines;

he planted explosives under police cars. The Magoo's Bar bombing marked the begin-ning of a brief interlude in the armed struggle about which the ANC was always a bit ambivalent - a phase of pursuing what it called "soft targets." More bluntly, this has been called terrorism. At his trial Mr. McBride, hoping to protect the

ANC and to generate extenuating sympathy, said he had acted on his own, driven by his impover-ished childhood and the embittering influence of his father, a schoolteacher-turned-welder who despised whites. Now he says — and the ANC confirms, embracing him as a hero — that he acted under detailed instructions.

"The bar was identified by ANC intelligence as a watering hole of the army and police," he said "Unlike our previous policy, when we showed great restraint about bystanders, the new objective was to go after military personnel and not to show too much restraint about whether bystanders got injured or not."

Mr. McBride is convinced that two factors made his crime a particular nightmare to South Africans. One is that the victims were almost all white, Most of the casualties in the apartheid wars were - and are - black.

The second difference, he believes, is that South Africans were alarmed to find a "colored" taking up arms with blacks. "Coloreds" were accorded marginally better treatment and were expected to identify with whites.

Top Rivals **Mubarak to Quake Victims: Be Patient** Square Off

CAIRO - President Hosni Mubarak warned earthquake victims on Sunday against street protests, saying "loud voices" would not in-fluence government relief operations.

Speaking after protests by home-less people boiled over into a riot in Cairo on Saturday night, Mr. Mnbarak said that everyone would receive shelter but that the process could take four to six weeks. "We should be patient," Mr.

Mubarak said. "Marches and loud

sands homeless, said the govern-

the state to solve the problem." But people waiting for assistance outside government offices after the quake last Monday, which killed 541 people and left thou-

come down on the streets and see signs of the riots were three what the state of people is like," smashed traffic lights and burn said Ahmed Salim, a father of six.

Riot police kept a close watch on Cairo after the street protests on Brotherbood, a fundamentalist Mubarak said. "Marches and loud Saturday, in which officers said group credited by many Egyptians voices will not prevent us from pro- some 25 to 50 people had been with responding faster to the needs

ceeding along the road drawn by arrested. Armored trucks and vehicles packed with not police were poised at major intersections in Bulaq, where the police fired tear gas on Saturday night to scatter youths throwing stones.

Streets were crowded with nor-"We would like the president to the of the risks were crowded with nor-

Mr. Salim said the Muslim

from the Beijing, Chengdu and

Jinan military regional commands.

At the brief closing ceremony, the nearly 2,000 delegates voted unanimously four times in a show of hands to adopt or pass all the resolutions before them.

Although the congress has dominated the headlines and the television news, most city residents are following the personnel changes with little interest. One white-collar worker said. "Look, people only care that the ones who get promoted don't let food prices and gas prices rise too quickly.' Among the hard-liners who were purged were the director of the People's Daily, who was responsible for much of the newspaper's harsh invective that followed the 1989 Chinese Army crackdown on democracy; the head of the party's propaganda department; the acting culture minister, and the Beijing party secretary. Some of these individuals had been criticized by name during Mr. Deng's trip to southern China carlier this year, the region that is most economically dynamic. Mr. Deng's trip was the catalyst for this latest push for reform. At the same time, several officials who were closely allied with the former party chief Zbao Ziyang, reviled by hard-liners, were also removed from the Central Committee. They included the former culture minister and one of China's best-known writers, Wang Meng, who tried to sue authorities for slandering his work; and Yan Mingfu and Rui Xingwen, former members of the party secretariat under Mr. Zhao.

tive to Third World buyers and further undermining efforts to stop the spread of nuclear arms.

Despite a cooperative relationship with Moscow, the United States has so far been unable to stop the Russian sales. Russian officials seem to have decided that the proceeds from arms and technology sales are worth the risk of irritating American policymakers.

Washington seems to have concluded that supporting change in Russia is more important than drawing a firm line against weapons sales and threatening a reduction in financial assistance.

Moscow is proceeding with the sale of diesel submarines to Iran, and a Russian company, Glavkosmos, is selling a rocket booster to India in violation of an agreement restricting technology for ballistic missiles. A senior American official said the United States had complained to Russia and China about

the sale, apparently to no effect. Undermining American leverage is the fact that Western nations, including the United States, have shown little restraint themselves in selling arms.

Washington, although it has exhorted governments of other indus-trial nations to control the spread of destabilizing weapons, appears

# **CIA Leader** Sets Accord In Moscow

By Margaret Shapiro ngton Post Service

MOSCOW -- The CIA and the Russian intelligence service, for decades archenemies, may work to-gether to stop the spread of nuclear weapons and to fight organized crime, drug smuggling and terror-ism, the U.S. Embassy in Moscow said Sunday.

In a statement issued at the conclusion of an unprecedented trip here by Robert M. Gates, director, of central intelligence, the embassy reported that "the possibility of contact and joint activity between the Russian and American intelli gence services were discussed. The talks were cordial and both sides vere satisfied with the results." Mr. Gates, the first CIA director

visit Moscow, spent three days here, meeting with President Boris N. Yeltsin, the foreign intelligence chief, Yevgeni M. Primakov; the head of Russian military intelligence, Lieutenant General Fyodor Ladygin and other military offi-

cials, according to the statement, Except for the statement, little office sort, for short was revealed by either side about Mr. Gates's visit, which followed similarly secretive stopovers in 14 City on the Warsaw and Budapest. Since the Dvina crumbling of the Soviet Union and 16 Foil pursuers its Communist system, CIA ana-16 Fault lysts and others have been wel-17 Voodoo comed here for discussion as the Russian service has sought to rework its image at home and abroad. The idea of cooperative efforts to

combat drug smuggling and terrorism, both of which are on the rise in this area of the world, have been discussed in the past by the two agencies. But the statement Sunday, including nuclear nonproliferation and organized crime, indicat-ed the possibility of broad-based cooperation on issues of growing rtual concern.

Nuclear nonproliferation, in part ticular, has been much emphasized by U.S. officials visiting the former Soviet Union, because they fear that control over the base former Soviet arsenal could be lost. In addition, military high technology is one of the few areas in which Rus-PIE sia is competitive with the United States worldwide.

nav A Donor's Good Deed For Some Good Reads to him.

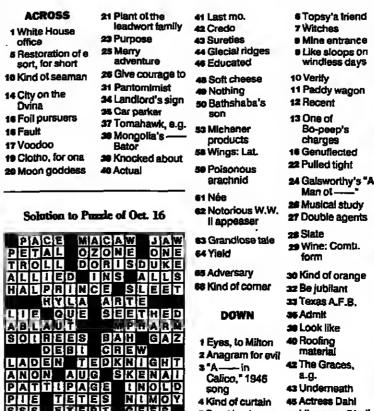

The academic adage "publish or perish" took on new meaning last week when a Nevada businessman announced a \$10 million gift to Harvard Divinity School. The donor, Robert A Jones, said he had been inspired to give the money after finding that so many good books in religion were being published by faculty members, researchers and students at the school.

He told The New York Times about attending a weekly Bible class for 15 years in the San Francisco Bay area. "Every week we would have so many questions for which we wouldn't have solid answers," said Mr. Jones, chairman of Jones International. a financial management firm. "I began buying and reading books in the field, and that led me to recognize that some of the best work was being done at Harvard Divinity School."

The \$10 million gift, the largest in the divinity school's history, was announced as it observed its 175th anniversary.

# APITAL MARKETS ritain May Borrow Marks

o Pay for Intervention

## By Carl Gewirtz tional Herald Tribuse

ARIS - A high level of new-issue activity is expected to be sustained in the Deutsche mark sector of the international capital market this week, with Britain widely rumored to be planning to float 5 billion DM worth of bonds. Britain

ds the marks to repay the massive intervention by the Bundesik during last month's storm in the foreign-exchange market. Although Britain dropped out of the European Community's of exchange-rate mechanism and freed sterling to float - it rently trades at 17 percent below its previous central rate against mark - the cost of the futile intervention is large. Bundesbank officials have estimated last month's total interven-

a at 92 billion DM and its sident, Heimut Schlesinger, publicly stated that more in 44 billion DM was spent iending sterling and the lira rt the pound.

in fact, the Bundesbank intervention. in't spend anything. More

cisely, it extended credit to is central banks whose currencies were under attack. Under the les of the system, the credits — or loans — need to be repaid 75 ys following the end of the month in which the intervention curred. That brings the due date to Dec. 15 although a threeonth extension is possible.

But that's expensive. Interest on the loan probably runs at about annual rate of 11% percent, the current rate on three-month ropean Currency Units. That is because the book-keeping is corded in Ecus, the targeted common currency of the EC's oposed monetary union.

Pricing the debt in European Currency Units also means that the indesbank will share a very small part of the real cost of the tervention. The mark has appreciated by some 3 percent against e Ecu due to the devaluations of sterling, the lina and the peseta. is means it will take fewer marks than were initially lent to wipe it the debt recorded in Ecus.

Britain, which early in September borrowed 5 billion DM rough a syndicated bank loan denominated in Ecus, is also pected to seek another loan of that size from international banks. Last week's activity in the DM bond market was led by Sweden, hich sold 2.5 billion DM of five-year notes carrying a coupon of 8 creent. Officials at the Swedish central bank refused to comment a whether the funds were aimed at repaying debt owed to the undesbank. To defend the krona during last month's attack, nort-term interest rates were pushed up to 500 percent; Sweden, though not a member of the Community, pegs the value of its rona to the mark.

The Swedish deal, increased from the initially indicated 2 billion M, was the first ever offered in the DM sector using the negotiatd fixed price re-offering common in the dollar sector.

This obliges underwriters to offer paper to investors at the agreed tice during syndication and assures the managers of a uniform commission - in this case 0.3 percent, or 30 basis points. Institu-See EUROBONDS, Page 11

# **Royal Sets** East Europe on the Brink, Report Finds **Del Monte**

By Erik Ipsen International Herald Tribune

LONDON - Forty to 80 percent of the companies that make up the contomics of Eastern Europe are on the verge of bankruptcy, according to a report for release Monday by a London-based institute that offers one of the gloomiest assessments to date of the region

Paul Reynolds, an economist at the Adam Smith Institute and one of the report's two anthors, said: "Forty to 80 percent of the on the verge of bankruptcy and being sup-ported by state banks printing money. "How long can this go oa?"

The report, which focuses not on macroeconomics but on the region's companies and on the privatization process, warns that the selloff of state enterprises has gotten so bogged down it threatens the economies as a whole.

The authors refer to the East European

governments' "grandiose" intentions for pri-varization and labels them "largely a sham." Specifically, it looks at the pace of privati-zation in Hungary, Poland and Czechoslova-kia and predicts that at the current rate it model table 29 process to call off helf of the would take 28 years to sell off half of the state-owned enterprises.

International Herald Tribune

PARIS - Rumors about mas-

November will drive up U.S. inter-

est rates swamped the foreign-ex-

The rumors were multiform,

of the pesets, escudo and Irish pent

that would lead to a substantial cut

to return to the system.

"But in fact most of them will be bankrupt and closed in five years anyway," the authors concluded.

They also said that the situation in the rest Eastern Europe was even worse than in those three countries.

To prevent what Mr. Reynolds called an comportic "implosion," he and his co-author call for a speeding up of privatizations, which they claim have now nearly ground to a Standstill

Normal methods of selling off enterprises simply do not work, they said.

The report recommends a variety of programs instead, ranging from a buy-now, pay-iater plan by which companies could be leased -- for a period of years ahead of the actual sale — to the governments actually paying people to take troubled companies off the public purse.

"New ways have to be found to get un-healthy companies into the private sector," Mr. Reynolds said.

The authors lay the largest share of the blame for the slow progress of privatization on the region's politicians.

Too many of them, Mr. Reynolds said, remained committed socialists reluctant to do away with the command economy, and

nationalists reluctant to open up their economies to Western investors. He insisted that much of what he and his

co-author had to say merely reflected a widespread, deepening pessimism among both East European officials and businessmen as well as their Western advisers.

Mr. Reynolds said he hoped the report and its bleak tone would spark some change. These countries have reasonable work ethics and have had long, long histories of indus-trial and commercial success,' he added. "It is easy to forget that they were once healthy and

successful countries and can be again, Russia to Privatize Oil Industry Russia's monolithic oil industry, the world's second biggest, will not escape the sweeping privatization process intended to breathe life into the emerging free market system, Reuters reported from Moscow.

Izvestia said a presidential decree had been drafted to reverse production declines and inject competitive instincts into one of the most conservative sectors of industry.

"The process of introducing shareholding companies should begin this year," it said. "It will be carried out rather carefully and last for about three years, although a quicker pace can only be welcomed."

# **New Hope** For GATT Round **Officials Expect** Breakthrough on Farm Subsidies CAMBRIDGE, Ontario -Trade representatives from the United States, the European Community, Canada and Japan agreed

One Sight For The Future

TAEJON, KOREA

For Inio. Fax:(82-2)551-1316

Page 9

on Sunday that they expected a breakthrough on the issue of agri-cultural subsidies in a "matter of days."

"We're looking for a break-through in those issues that have blocked progress to date in a mat-ter of days," said the U.S. trade representative, Carla A. Hills. Mrs. Hills was referring specifi-

cally to the controversial cutbacks in EC agricultural subsidies de-manded by the United States. The EC external affairs commis-

sioner, Frans Andricssen, said Washington and Brussels could overcome an impasse in the prickly issue of agricultural subsidies by November

Farm subsidies are a key stumbling block in the six-year old Uru-guay Round of trade talks sponsored by the General Agreement on Tariffs and Trade. The first deadline for an agreement passed two years ago.

Such a deal between the United States and Europe may work to the benefit of President George Bush, who has pressed for a resolution of the stalled trade talks to boost his

flagging re-election bid. When asked by reporters if an agreement was possible by Novem-ber, Mr. Andriessen replied: "By the end of this month. Yes, I think is a contribute" it is possible."

We expect that sufficient proess will be made on agriculture in the days ahead between the United States and the EC so that on an early date the negotiations can be brought back to Geneva within the multilateral process," said the Ca-nadian trade minister, Michael Wilson, at a press conference.

Mr. Wilson was speaking on be-half of all four ministers gathered here for a weekend quadrilateral trade meeting, which dealt almost entirely with the Uruguay Round. "We're determined to press ahead to complete the Uruguay Round by

billion DM is owed to it from the the end of the year," he added.

You Can Lead Them to Market, but ...

Prime Minister Pierre Bérégovoy's project to fax — it shouldn't have been. raise up to 50 billion francs (\$10.1 billion) in fresh capital for French companies by instigating a stock-market savings plan has gotten off to a weak start, victim of a bearish mood on

The Plan d'Epargne en Actions, or PEA, was launched by banks on Sept. 14, and despite expensive promotional campaigna, the French have not shown any rush to sign up for the savings plans, which provide attractive tax exemptions on gains if the capital is held onto for at least five years.

Générale. "It's the same thing I hear from the other branches, and from the other banks." Bankers say that most of those who have opened a PEA have not added fresh capital to the market, but rather only transferred their existing stock holdings into the new tax shelter. Credit Lyounais said that of the 200,000 plans it had opened in the past month, half of

the investments came from transfers. A spokeswoman for the French Banking Association was more upbeat, saying that new capital "undoubtedly" would be added

to the savings plans over time. Despite Mr. Berégovoy's plea for the French to invest more for the long term, the smart money, banker say, is pouring ever faster into money-market funds, now boosted by the deep cracks in the European Monetary System. The short-maturity funds are offering returns of over 10 percent.

# Paribas Squirms in Cement

Paribas is squirming these days, caught between a will to come clean publicly with all it knows about the Ciments Français offbalance sheet problems and the demands of conservative lawyers whose natural inclination is to clam up.

were pointed at anyone, successfully finger argued for silence until all the damage could be assessed and reported along with the compa-ny's first-half carnings, due by month's end.

#### The Fax Did It --- Well, Maybe

The Bourse, trying in recent years to im-prove the flow of information to investors, still has a good ways to go, apparently. Wit-ness last Friday's 18.5 percent plunge of Lo-gris Industries, to 156 france, on volume that soared 10-fold over average trading levels. The Rennes-based maker of plumbing fix-

tures, it seems, had disappointing first-half earnings to report. The only problem is that it did not report them.

Although results were approved by the Legris board last Thursday, reporting of them was not planned until this week. Sources said that following the Thursday

board meeting, the results were communicat-ed to the BALO, the official legal journal, with publication set for Monday. A company spokeswoman, however, said the plan to use the legal newspaper had been canceled, and

#### Can You Cure Euro-Pessimism?

Last Friday's emergency summit agree-ment in Birmingham, England, to instill a more democratic spirit in the operations of the European Community, may be just what the doctor ordered to combat a new bout of Euro-pessimism in France.

Much of last month's 49 percent opposition to the Maastricht treaty on European monetary union was based on fears that technocrats, unrestrained by the will of the peo-ple, would end up calling the shots in the economic and political union,

Such criticism has helped turn the majority of the French away from hope in the near-term creation a federal Europe. According to a new poll by Sofrès-L'Expansion, only 42 percent believe that a "United States of Enrope" will come into existence by the year 2000, against 39 percent who don't think it is a possibility. In 1989, as French excitement about the Single Market peaked, 57 percent thought that a US of E would come together before the turn of the century.

# Swissair Plans to Idle 5% of Staff in 1993

ZURICH - Swissair will cat 1,000 jobs, or more than 5 percent of its staff, by the end of 1993 in an effort to reduce soaring costs, its chief executive, Otto Lopfe, said in an interview published Sunday. In an interview with the weekly Sonntagsblick, Mr. Lopfe also gave a first hint that a merger with another airline could be a part of issair's long-term plans.

High staff costs remain Swissair's chief problem in staying competitive. They make up 40 percent of Swissair's overall costs, com-pared with 20 percent at British Airways and less than 30 percent at Lufthansa AG. The Swiss airline has already cut 400 jobs this year. Mr. Löple said it was hoped that the new job cuts could be achieved through attrition but he did not rule out dismissais.

"We have to adapt to the worldwide economic slowdown, the enormous price battle in air transport and, from Jan. 1, 1993, the

freeing of prices within the European Community," he said. Asked if a merger with Austrian Airlines or SAS was possible, Mr. Lopfe said: "For that to happen, laws have to be changed first. That takes unce. But that's the direction things are going in."

He also said he expected the United States to sign an "open skies" pact with Switzerland next year, similar to one already concluded with the Netherlands. Under such a pact, each country gives the other unrestricted access to its airports and markets.

also view Mr. Clinton as a moderate and say that with unemploy-ment at 7.5 percent and capacity utilization at about 78 percent, the economy has room to grow without too much inflation.

Analysis said that the catalysi for the market's decline was a report in the Los Angeles Times about Mr. Clinton's proposed economic plan for a quick stimulus next year if he is elected.

"Clinton fear was everywhere." would pay close attention to the egist for Technical Data System. last of the three presidential de- "Fundamental indicators tell us that this market is not trending. bearishly," he added. "Rather, people were long expecting a Fed case. which is now a distant memory in the minds of most."

Analysts said Mr. Clinton was considering an accelerated economic stimulus package that included additional federal spending and tax cuts.

According to the Los Angeles Times report, Mr. Clinton asked his staff to study ways to restructure his proposed agenda with an emphasis on quick stimulation of the economy early next year with deficit reduction to be tackled later.

But an economic adviser to Mr. Clinton dismissed the report and said the candidate had not asked his advisers to prepare an accelerated economic recovery program. He said the governor remained strongly committed to holding to deficit reduction targets.

Mr. Clinton has suggested increasing the present 31 percent top marginal tax rate to 36 percent for taxpayers with an adjusted gross income of over \$200,000. He also is considering a 10 percent surtax on

millionaires. Rao Chalasani, chief investment strategist at Kemper Securities, said market concerns over a prospective Clinton victory were "overblown" and provided "opportunities for investors in long-term bonds."

He added; "There is no reason that the spread between 30-year government bond and 90-day Treasury bill equivalents is at a historic high of 460 basis points. The risk of owning long-term bonds will diminish because the expectation of a Clinton victory bringing higher inflation is overblown,

He said that "continued low returns of 3 percent and under on cash investments call for greater investments in cash alternatives."

# **Bank Regulators Decry Costs**

1996

1996 4

DM 100

OM 150

BOSTON - America's top bank regulators told bankers on Sunday hat the industry bore an unfair regulatory burden, but failed to spell out lans to relieve the load.

Andrew C. Hove, acting chairman of the Federal Deposit Insurance forp.; John P. LaWare, a governor of the Federal Reserve Board, and Acphen R. Steinbrink, acting Comptroller of the Currency, participated
 a a panel discussion at the American Bankers Association conference.
 Mr. LaWare said his Exam Council, established by last year's Federal
 Deposit Insurance Corp. Improvement Act to examine the regulatory
 Unden, had finished its work.

"We've a preliminary draft ready for circulation," he said, adding that the of the conclusions was that the \$10.5 billion estimate of the regula-ity cost for banks "might be too modest." The Fed official suggested formation of a nonpartisan commission to

ndy the industry's competitiveness and make recommendations that

ight have a chance to get through Congress. Mr. Hove of the FDIC said that "regulators must avoid, whenever they in, adding to the regulatory burden.

Mr. Steinbrink voiced concern about banks' ability to maintain profits their current, near-record, levels, especially if interest rates rise.

The same complaint was heard about Compagnie Bancaire's 250 million DM of five-year notes, of-fered at a spread of 38 basis points

and trading at the end of the week at a spread of 44 basis points. The European Coal and Steel

Community's 105 million DM of five-year notes was well received and Tokyo Electric Power's 1 billion DM of 10-year bonds was at-tracting demand from Asia. In the dollar market, Toyota Motor Finance, a Netherlands-

based financing arm of the Japa-nese anto company, offered \$250 million of three-year notes carrying a coupon of 5 percent and offered at a discount of 99.89. It ended the

week trading outside fees paid to underwriters at 99.60. The difficulty is that the paper can only be sold to institutional investors or to retail investors in blocks of \$1 million or more and

these holders are required to re-spect these limits if they trade the paper in the secondary market. The limitation is imposed by the Dutch authorities because more than 5 percent of the finance company's assets are loans to compa-

miss that are not part of the Toyota group. For the Dutch, this makes the company a quasi-bank or fi-nancial institution. Because Toyota An official said the exchange was nancial institution. Because Toyota being set up with advice from the Motor Finance is not subject to Chicago Board of Trade and would regulatory supervision of such m-stitutions, it is restricted in the way cial grain wholesale markets by (AP, Bloomberg)

BELING - The four-monthold Shanghai Metals Exchange will begin futures trading by the year's end, and Shanghai officials are making plans to open a grain fu-tures market, the official China Daily newspaper said Sunday. The plans are part of Shanghai's efforts to restore its pre-Commu-nist status as a financial center.

The newspaper said the Shang-hai Metals Exchange had been trying to standardize its spot contracts, an important step before moving to futures trading. It also has been gradually expanding its membership, now 48 companies, and scope of activity.

and scope of activity. It trades copper, aluminum, lead, zinc, tin, nickel and pig iron. Exchange officials told China's Business Weekly newspaper that the exchange had carried out 22 billion yuan (\$4 billion) worth of mot practicipate as of Our 2. They spot transactions as of Oct. 7. They said applications from foreign companies to become members of

the exchange would be accepted. Shanghai does not yet have a spot grain market, but the China Daily said the Commerce Ministry and Shanghai city government were making plans to open a grain and cooking-oil futures exchange in the first half of 1993.

The report said the exchange would be linked to a grain and cooking-oil wholesale market that opened in Zhengzhou in 1990 and is the nation's largest.

**Europe's changing appearance** may seem confusing.

Step by step, a Europe free of frontiers appears on the horizon. But as the new single market takes shape it's apparent that this new entity will still be extremely heterogeneous

As national customs barriers fall, in order to stay competitive, business will have to take account of the reality of the single market - the local customs which remain. Which is why, more than ever, it's critical to have a bank with a European perspective as your business partner. A bank like ABN AMRO Bank which can justifiably claim Europe as its domestic market.

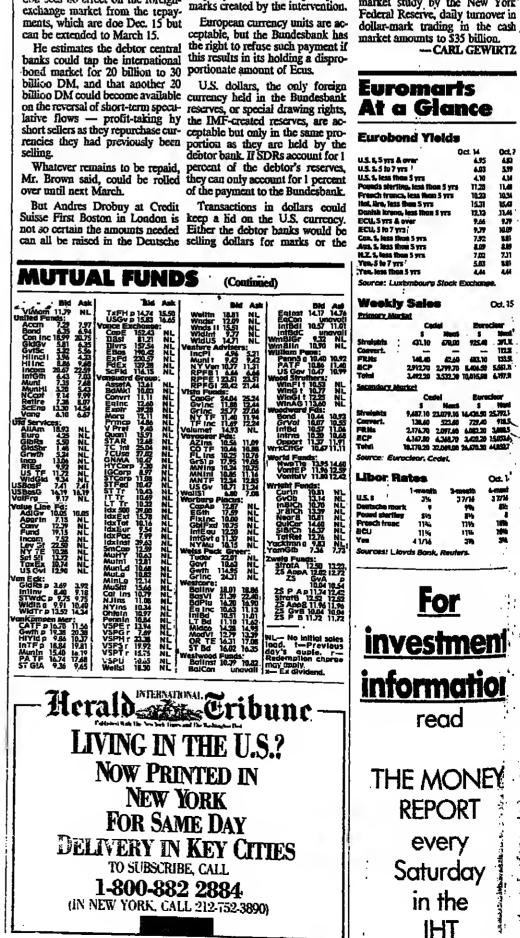

Because for over 130 years, we've been familiar with Europe. Our policy of staying close to the customer, speaking his language and knowing his environment has lead to our network of 1570 branches in 20 countries throughout the continent. A network which will continue to grow as nur

plans for expansion in several other European countries become manifest It's what you might expect of one of the world's top twenty banks with a sound financial base of US\$ 242.7 billion in assets and US\$ 9 billion in shareholders' equity.

ABN AMRO Bank is fully integrated into its various national markets providing us with an unequalled perspective of this heterogeneous continent, allowing us to distinguish fact from fiction, changing a hit and miss approach to a sure-fire strategy.

# European Influx Challenges NHL's New World Order

By Joe Lapointe

Special to the Herald Tribune NEW YORK — Twenty years ago, when Canada's ice hockey team played the Soviet Union in a seminal "Summit Series," the overconfident Canadians assumed they would dominate in a sport they had invented.

four games in Canada, the stunned and chas-will pay him \$42 million for seven seasons, the kened Canadians had to regroup and rally in biggest salary in his sport. Russia. Paul Henderson's goal late in Game 8 in Moscow gave Canada a 4-3-1 series victory and s glorious place in the history of his home and native land.

. The downbeat, however, was a rude awakening. Canadian eyes had been forcibly opened to a new playing style and a new talent pool for the National Hockey League. The game on their side of the Atlantic would never be quite the same.

Over the next two decades, the Europeans began to find work in the New World. First as a trickle, later as a flow, came the Swedes and the Finns and the occasional defector from Czechoslovakia.

Over the past four years, with the breakup of the Soviet Union, the parade has included Rus-sians, Ukrainians, Lithnanians and many Czechoslovakians, their contracts sold for cash by their former teams,

With the current National Hockey League season just under way, 99 players on NHL rosters were born outside North America, alnost all in Europe, making up roughly one-fifth of all league rosters of all league rosters.

Union in a seminal "Summit Series," the over-confident Canadians assumed they would dom-tate in a sport they had invented. After losing two and tying one of the first fur sames in Charles Cup the last two seasons and are strong contenders again this season. Lemieux's Penguins, who play an up-tempo style, have won the Stanley Cup the last two seasons and are strong contenders again this season. Lemieux's Penguins, who play an up-tempo

But one of the biggest reasons the Penguins won the cup last season was the play of their young Czech star, Jaromir Jagr. Enropeans are likely to make their mark again this season.

During competition before the All-Star game in February in Philadeiphia, the two fastest players in the speed-skating competition were Sergei Fedorov of Detroit and Alexandr Mogilny of Buffalo, former teammates on Red Army, During the NHL draft last summer in Montreal, 10 of the 24 players chosen in the first round were from Europe.

Although North American and European styles have grown more similar since 1972, there are still fundamental and philosophical differences at the developmental level. Most NHL playing and management jobs are filled by Canadians who came up through Canada's junior hockey system. In these teenage leagues, teams often play three games a week, travel extensively and practice when they can find time. Fighting is permitted without ejection,

Last season's rookie of the year, Pavel Bure, came to the Vancouver Canucks from Central Red Army of Moscow. And after the first four games of this season, Teemu Selanne of Fin-games of this season, Teemu Selanne of Fin-

their thinking. Last summer, partly to accom-modate the European style, the league tough-ened rules against stick fouls and fighting. Team owners and league officials say the goal is to encourage skating, passing and shooting and to discourage intimidation and interference tac-

Some NHL executives want to schedule regular season games in Europe and possibly expand there in the near future. "Perfect timing to jump in there," said Mar-

ead with a stick and kicked him with a skate.

only guys who really like this type of hockey are the imports. I want to see the Canadian hockey I was brought up with. You've got to get your nose bloodied, you've got to get a little bruised." With the increase in European players, inter-

preters are now part of the scene in postgame locker rooms. In the corridors it is common to hear two or three players from each team speaking in Russian before breaking up and heading off in different directions.

'I like Canadian hockey, but it seems like it's a dinosaur now. The only guys who really like this type of hockey are the imports.'

Ted Green, the Edmonton Oilers' coach

The mix of languages and cultures creates unexpected alliances, even among the Europe-ans. David Volek, a fifth-year New York Iscel Aubut, owner of the Quebec Nordiques. "There's a lot of money there. We're going to have to look at it very seriously before they create their own league and steal our own players." lander from Czechoslovakia, finds it surprising that two of his teammates are from the former As the teams adjust to the new rules and the Soviet Union. As a boy in Czechoslovakia, Volek said, he was forced to study Russian in new players during the first month of the 84game schedule, there are already signs of culturschool, but he disliked the language and spoke it seldom. Although technically allies, his counal stress. In the training camp of the Detroit Red Wings, there were several clashes between try and the Soviet Union were rivals in many North Americans and Russians. Max Middendorf, a Detroit farmhand from Syracuse, hit Vladimir Konstantinov in the

areas, especially in hockey. Jagr, the Czech star who wears No. 68 on his back in honor of the year of the so-called Prague Spring, thinks the Europeans may change the style of the NHL "Europeans are

land, who joined the Winnipeg Jets this year, was second in the league with nine points. Only the Penguins' star, Mario Lenieux, with 14, has nore. Lenieux's Penguins, who play an up-tempo Cup winners in Edmonton. But a top rockie for the Rangers is Alexei Kovalev, signed this season from Dynamo Moscow.

Another Patrick division star is Eric Lindros, the highly touted, 19-year-old rookie of the Phil-adelphia Flyers, who refused to play for the Quebee Nordiques and was traded last summer. In his first four games, Lindros has four goals.

The Adams Division, the league's weakest, was further diluted by the addition of the Ottawe Senators, an expansion team in the Canadian capital. The best of this bunch might be the Boston Bruins, whose newest sharpshooter is Dimitri Kvartahov, a Russian. After three games, he led the team in goals with three and

in points with six. In the Norris, the most talented team is Detroit, which finished first in this bracket last season. Among Detroit's many Europeans is Fedorov, a Russian now in his third season, who combines offensive and defensive skills with hard work. But he isn't even the best center on his team. That status goes to Steve Yzerman, the captain. The Norris also includes the Tampa Bay Lightning, an expansion team that used a woman goaltender for one period of one game during the exhibition season.

The declining Smythe Division is weakened further by the loss of the Los Angeles Kings' Wayne Gretzky, the game's best player of the 1980s, who is out indefinitely with back problems. Vancouver is favored to repeat as champi-on here in the regular season in part because of better with the puck," he said. Jagr and the Penguins play in the best of the Bure, who is becoming something of a cult hero.

# **Braves Beat Jays, 3-1, to Open Series**

Damon Berryhill's three-run homer in the sixth, left, gave the Braves' pitcher Tom Glavine, above, something to cheer about. But for Jack Morris, the Blue Jays' pitcher, it meant an early exit.

Berryhill Hits 2-Strike, 3-Run Homer in 6th **To End Morris's 18-Inning Pitching Streak** 

By Mark Maske Wishington Post Service ATLANTA — Just when the At-

lanta Braves had to be wondering whether they had somehow wronged Jack Morris in a past life and the World Series was his forum for revenge, their postseason good fortune with catchers who once weren't in their plans continued.

The unlikely hero Saturday night was Damon Berryhill, who turned a too-high forkball from Morris into a three-run home run with two outs and two strikes in the sixth inning. That was all Tom Glavine and the Braves needed to post a 3-1 minmph over the Toronto Blue Jays in Game l of the 89th World Series in Atlan-

ta-Folton County Stadium. "I made one bad pitch," Morris said after his first World Series loss in six starts and five decision: "It was your basic 390-foot banging breaking ball," added Morris, who also became the fourth pitcher to appear in a World Series with three different teams.

On the 356th day since Morris, then pitching for the Minnesota Twins, shut ont Atlanta over 10 innings to win the seventh game of the 1991 World Series, the Braves struck back. But it wasn't easy. Morris spent five innings weaving his way in and out of peril, extending his streak of shutout maines against Atlanta in World Series play to 18. Before Berryhill's

Glavine's slump --- he was 1-5 homer, the Braves hadn't scored in their previous 19 World Series in- over his final seven regular season outings, then lost twice in the Na-Morris couldn't quite wriggle tional League playofts - had led

He pulled his tee shot far off the fairway and into some thick rough. He landed in the greenside bunker, but

a well-struck shot from the sand gave him the chance of a par. He missed from 1.5 meters and Gilford, who parred, was ahead for the first time with one hole to go.

# **Designers Hide More, but Show More**

By Suzy Menkes nal Herald Tribune

PARIS - Liberty, modernity, transparency are the issues dominating the fashion shows and uniting designers who have the power in Paris. The strongest signal is for transparency. Claude Montana had chiffon wings beating behind a sinuous

silhouette. Romeo Gigli's fragile models were seen through dresses as misty and translucent as Venetian glass. Jean-Paul Gaultier went back to the Garden of Eden,

PARIS FASHION

with the body as forbidden fruit glimpsed through tresses of hair. As bared flesh takes the veil, designers are both covering more and showing more of the female body than in any other Paris ready-to-wear season. Fashion seems to presage a profound change in suggesting the end of a period of sexual license and female assertiveness that started 25 years ago.

Although it is a watershed fashion season, there are no quick-fix alterations to update next sum-mer's wardrobe. Hemlines are long, but there are lots of pants; skirts and dresses are in fluid fabrics giving modern women the freedom they expect and demand.

The most vibrant moment of the long Paris weekend was at Issey Miyake's show, when two figures leaped into the air, legs lying, pleated shirts twisting and tossing. As they landed on the runway, their clothes continued to spring, pulsate and quiver as though they had life independent of the bodies.

Miyake's show, which received the first standing ovation of this Paris season, proved the point of a spectacular presentation. The Japanese designer - who will celebrate 20 years of showing in Paris in 1993 - used William Forsythe and the Frankfurt Ballet to show in their vigorous modern dancing the weightlessness and freedom of the clothes.

The show, opened with the dancers jogging in what Miyake called "camouflage of the 21st century" - shirts and pants splash-dyed to look like shadows chasing over the cloth. Another extraordinary effect was a firma-

ment of stars airbrushed onto white cotton.

For all the futurist fabrics developed by Miyake's Tokyo stu-dio, the shirts, jackets or rainwear are just modern easy sportwear. Since the clothes express them-selves in movement, Miyake's silhouette is always in flux and nothing ever grips the body. But the designer's signature pleats give shape, texture and form. Inspiration seemed to have

been drawn from the elements, as black pleated dresses heaved like volcanie mud over the moving bodies, or waves of pleats broke over the torso. The show ended in poetic silence, with the shifting sand of beige cotton dresses moving down the runway. It was an cceptional fashion moment. Claude Montana usually

sculpts his silhouette like marble. This season he had reworked it as putty — using crepe and silk to soften the line. Technically it was a fine achievement and his show was dramatic in its purity and its presentation, yet there was not much change in direction, nor any attempt to melt the glacial image of Montana's woman

The show was dominated by wide pants in soft crepe. Over them unfuried long coars that were sheer, light and like elongat-ed shirts with tails at the back. Other coats billowed in silk, or the pants were topped with an organza shirt the consistency of beaten egg white.

The cutting was impeccably sharp while the fabrics and colors were soft: buttery suede in mushroom beige for a midcalf safari dress. Hairstyles kept an angular line at the front while failing free at the back. Jewelry for evening was barnacles, stick coral and weedy fronds - all in white, like the sea spray of chiffon blowing

around the crepe pants. - bulbous and beautiful but New was the fluid midcalf dress, which Montana cut in navy Gigli said that he was aiming crepe, perhaps veiled with chiffon for "simplicity and clarity." He scored on the second with his or with a splash of white organza. The dress also came over pants as a tunic - stunning in ginger suede with rich embroidery. Montranslucent fabrics - steely mauve, watery green and blue -

tana handled transparency defily and lightened the clothes, even if he still sculpts from the same mold. Romeo Gigli is in a world of his in net with opaque stripes.

own. He showed the slim-line Although bosoms were bared pantsuits with high-battoned in bodices as sheer as shards of

Montana's white crepe column with chiffon, left, and Gaultier's lace tabard on a stretch dress. glass or made of cobweb-fine croackets that he first gave to the chet, Gigli's woman is always fashion world, and made jackets in rich and glearning fabrics. But he also had skirts like blown glass

going. The show looked too much like a costume party — but it had a romance and vision.

Jean-Paul Gaultier's show was a romp, but with a body of serious clothes that make him an inventive designer and a hero for the and with his plays on transparen-cy, which included a latticework of straps over the shoulders of new generation. Just when you thought there was nothing else to be done with the mannish pindresses or creating a simple tunic striped trouser suit, he made the pants empire-line, flowing from the bosom

Gaultier's show was about veil-

ing body and clothes. He had fringed skirts swaying over jeans, fragile and never sexy, which is the way that fashion seems to be of fabric to leave danging fronds from thigh to ankle.

> of wigs made into clothing - in-cluding a beard on the male chest and locks curling round the body - brought the house down.

What did it all mean? Gaultier called it "a pure collection, back to a kind of innocence." The transparency in these Paris shows does seem to be, rather than daring or decadent, a new approach to femininity. Or maybe it's as old

as Eve.

Gaultier's Adam and Eve scene

'Buksy' and the New Russian 'Imidzh' By Serge Schmemann

LANGUAGE

N EW YORK — If dragging Russia into the high-tech consumer age has proved harder than any-one suspected, don't blame the language. Since the

dawn of the Age of Perestroika, the jargon of Ameri-can business and electronics has been eagerly welcomed in Russia, from the entry-level biznes and kompyutery through griny, or buksy (dollars), press rilis One reason is that unlike the Russian character.

which is traditionally resistant to innovation, the Russian language, with its plethora of prefixes and end-ings, is emmently suited to adopt and shape verbal imports. Tack on a syllable at the front or back, change a thing here or there, and a new arrival takes on forms even its parents would not recognize. Xerox, for example, keenly sensitive to the misuse of its familiar trade name as a common verb, might easily overlook the rise of otserit - a Russian evolution of or-kseroks-

irover (10 make a Xerox). Through a similar evolution, the ponderous video-Through a similar evolution, the ponderous video-cassette player has become a common vidik. Or slap on a feminine ending, and stolid *biznesmen* becomes coy, female *biznesmenka*. An endearing diminutive ending transforms a BMW sedan into a *Bemnushka*, the Russian yuppie's longed-for Binmer. The invasion has not been without resistance. Pati-

otic linguists have tried hard to runnage through pre-1917 lexicons for terms suitable to the new era, but their successes have been few. Market, for example, did remain rynok, but there was nothing they could do with marketing, a concept as alien to old Russia as to Soviet Russia. Nor could they prevent the traditional popechitel from becoming a sponsor, or a vklad from becoming an investitivya (investment).

In fact, for the most part there hasn't been any serious competition. Menedahment, brokery, dilery, convertat-siya, lising and holdingoriye kompanii have swept unop-posed into the new world of Russian commerce. In electronics, it has been a clean sweep. Russia's obsolete vychisitelinaya mathina (composing machine) was sim-ply no match for the Western kompyner, which roared in complete with lep-top, floppi, lazerny printer, softver and even dehoystiki. The only concession has been the mouse, which remains a Russian mysh.

Politics has proved equally disappointing for the traditionalists. An argument can be made by the pro-Western crowd that there is no Russian counterpart for fax. Czarist and Soviet Russia, however, did have their words for parliament. Yet the popular term for

the Russian legislature is neither the venerable veche, nor the czarist duma, nor the Soviet sovet (council), but a Middle English word, parlament. From there it is only inevitable that its deputaty will form a political oppozitive and fall into konfrontative with the, yes, prezident. Folks with problems no longer go to the Gorispolkom (short for a city council), but to the meriya --- where the mer (mayor) sits nurturing his or her reiting (rating) in the polls.

For all their grumbling, the purists' defense is weak. Russia, czarist or Communist, has always borrowed heavily from abroad for technical and political terms, whether from English, French, German or the Mongol tongues. The czar's title was derived from Caesar. An office has long been either a French byuro, a German kontora or an English ofis, and communism was riddled with internatsianalisty, tsentralnive komitety and

propaganda. But what really grated on patriotic cass was the force with which American pop colture assailed the language. It began long before perestroika, when dubing (jeans)

and rok music first schood the Russian baby-boomers. Once the gates opened, no modern man-about. Omsk was complete without a beisbolka (basebull cap), reybany (Ray-Ban sunglasses) or pleated slekry (slacks). McDonald's introduced the gamburger, and the rest was not far behind, from snappy enkormen on television news to the sekr-shopsy. The competition among the proliferating rock stations to sound Ameri-can has been so flerce that some have taken to signing on directly in English — "Radio Seven," "Radio Maximum," "Radio One-Oh-One." Intellectuals bave not been immune. Trendy aca-demics happily search for an effektivny instrument analiza relevantnogo aspekta (effective instrument

Intellectuals have not been immune. Trendy aca-demics happily search for an effective instrument analiza relevantnogo aspekta (effective instrument for analyzing the relevant aspects), while television news readers believe they can add authority to their reports with important-sounding borrowings like sizuation normalizingetsya (the situation is normalizing) or, more often these days, konfrontatsya intensifitisinger. sya (the confrontation is intensifying).

For some linguistic patriots, the vogue for imponed sing is more than an invasion of the same pop Americanisms that perpetually drive the French Academy up the wall. They see it also as a symptom of waning self-confidence among Russians, a yearning to hence a surjety or surjety or surjety become Western as quickly as possible.

п

"Where do I see the reasons for the temptation of the foreign?" wrote Y. Ramensky in Literaturnaya Gazeta, the venerable weckly review. "In an ignorance of lan-gange and history, in the absence of taste. But above al, in ignorance posing as sophistication. Many simplifi-cally link 'unswerving progress' with a foreign source. rejecting often unconsciously, their own 'wretched and powerless' homeland."

It is hard to deny a heavy streak of self-deprecation in modern Russian jargon. The ruble is known on the streets as derevyanny (wooden), and Amerikansky biznesmen — successful and respectable — evokes a completely different image from nash (our) biznesmen, who is perceived as shady and suspect.

Adding insult to perceived injury for the linguistic patriots is the fact that the verbal trade is distinctly one-way. Only a handful of Russian words have made their way into the global vocabulary, and some of the best known, noted the caustic writer Tatyana Tolstaya, are ukaz (decree), pogrom and knut (whip). She might have added guiag and commissar. To be evenhanded, Russia has also supplied sputnik and, more recently, glasnost and perestroika. But that hardly amounts to a balanced cultural exchange. All such soul-searching may be unduly Slavic. After so many decades of enforced isolation, it is only natural that young Russians would plunge into the glittering new world of kompyutery, sleksy, gamburgery and, yes, seks. It is to the credit of the Russian language that it has managed so quickly to embrace a lexicon that used to be not only exotic but also illegal. Or, as the hip new Russian would say, "Nyet problem.

Serge Schmemann, chief of The New York Times bureau in Moscow, is filling in for William Safire.
